

PERSONAL PORTOFOLIO

# SOFTWARE ENGINEER

WILDAN HARITS PRASETYO

# ABOUT ME

## HI, I'M WILDAN

With more than six years of professional experience in software development, I have successfully delivered a wide range of projects for airlines, software house, freelance clients, and tour agencies. My expertise allows me to design and build scalable applications, solve complex technical problems, and adapt quickly to diverse business needs.

## Skill Abilities

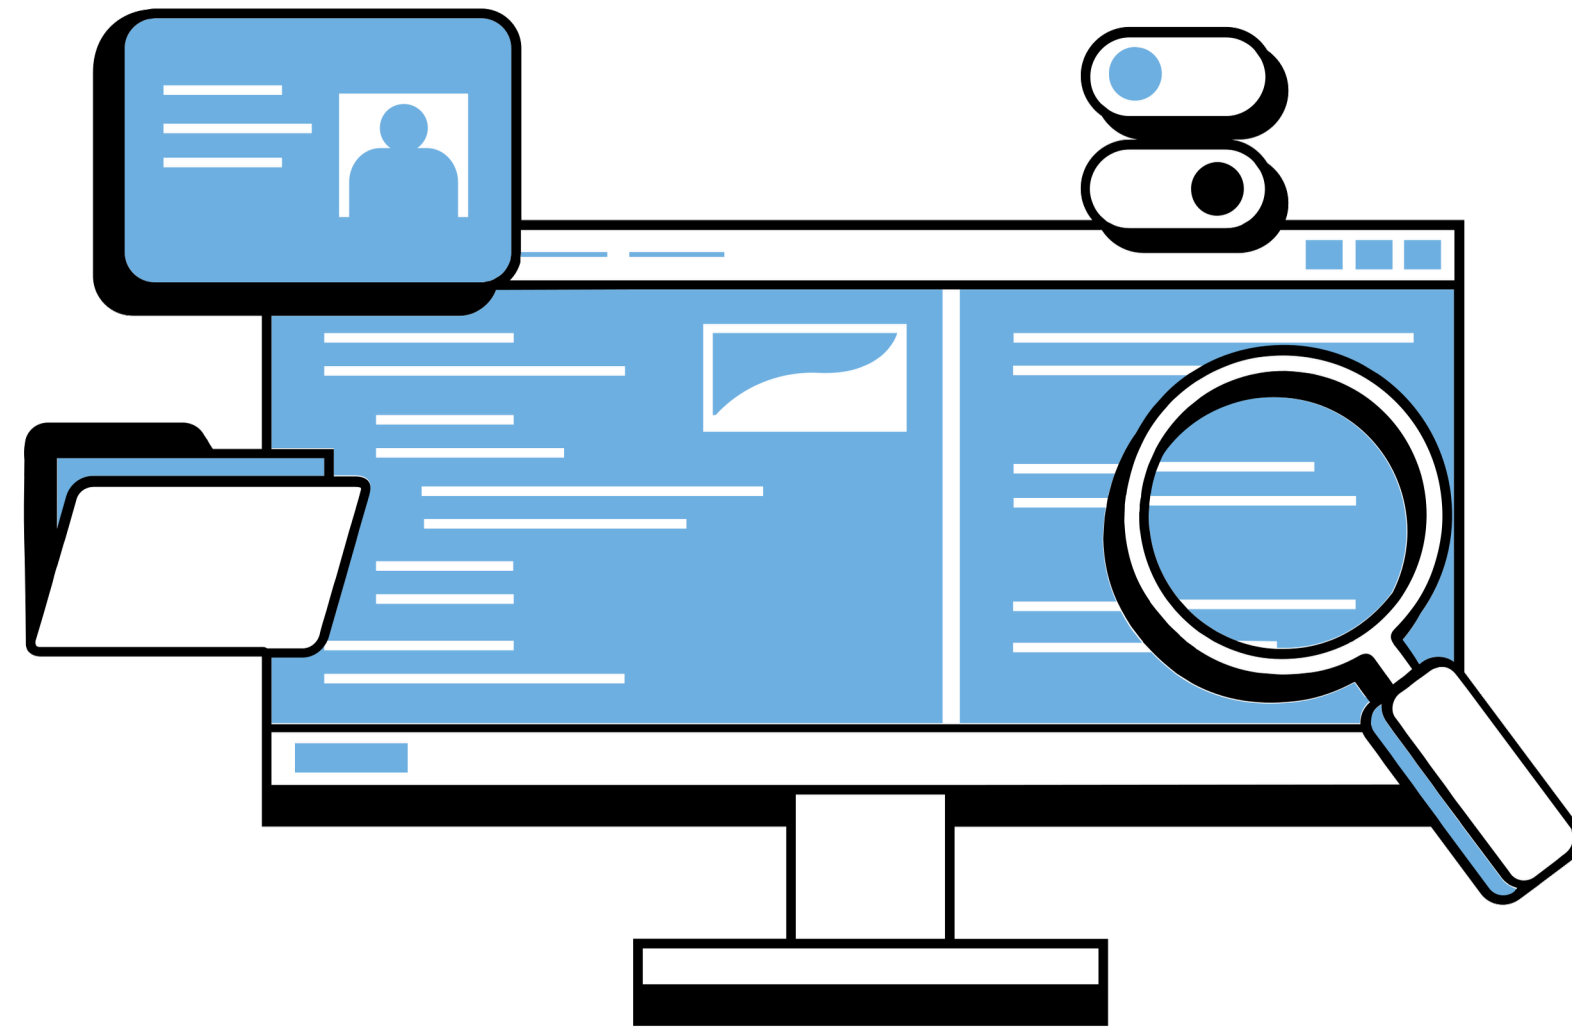

- ▶ **Stack Tech :**  
Laravel, Nest JS, Next JS, React Native
- ▶ **Database :**  
MySQL, PostgreSQL, Firestore
- ▶ **Version Control & CI/CD :**  
Git, GitHub/GitLab
- ▶ **Other :**  
RESTful API, AWS, Firebase

# OUR CLIENT

# My Portfolio

## Web-Based Projects

# Saudia Airlines Hajj

Comprehensive Hajj management system development for Saudia Airlines with more than 100.000 pax. Key features include pilgrim data management, departure group scheduling and organization, mutation tracking, and digital document handling, enabling smoother coordination and improved operational efficiency throughout the Hajj season.

## Backend Development (Express.js):

- **Designed and implemented RESTful APIs** for pilgrim data management, departure group scheduling, and mutation tracking.
- **Optimized database queries** for high-volume data request during Hajj season.

## Frontend Development (Laravel):

- **Built responsive, user-friendly dashboards** for administrators to manage schedules, documents, and group movements.

# Fullstack Developer

**Backend: Express.js; Frontend: Laravel**

**<https://hajj.saudiairlines.co.id>**

# Shafwah Holidays

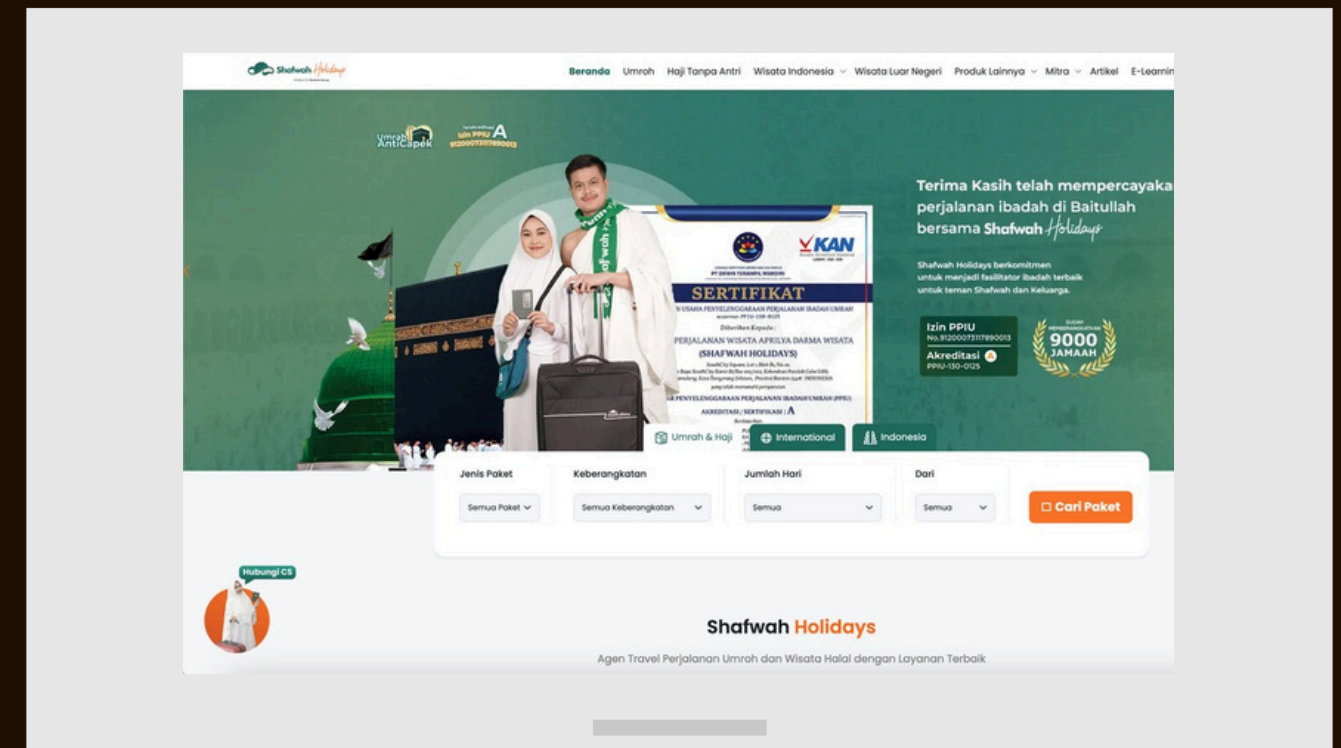

An integrated travel booking platform for Umrah, Hajj, and domestic/international trips. The system also supports concert ticketing, merchandise sales, and visa processing, and is designed to be easy to use for both customers and administrators, improving overall convenience and operational efficiency.

## Backend Development (Laravel) :

- **Designed and implemented RESTful APIs** for booking management, payment processing, and third-party service integrations (ticketing, merchandise, visa).
- **Built scalable modules** to handle high-volume data request bandwidth during peak seasons.
- **Optimized database queries** to maintain fast performance.
- **Integrated with many partner** system by use API and make documentation

## Frontend Development (Laravel Blade) :

- **Developed responsive, user-friendly** booking interfaces and administrative dashboards.
- **Implemented search and filtering** for trip schedules, pricing, and availability.
- **Integrated secure authentication and role-based access control** for administrators and agents.

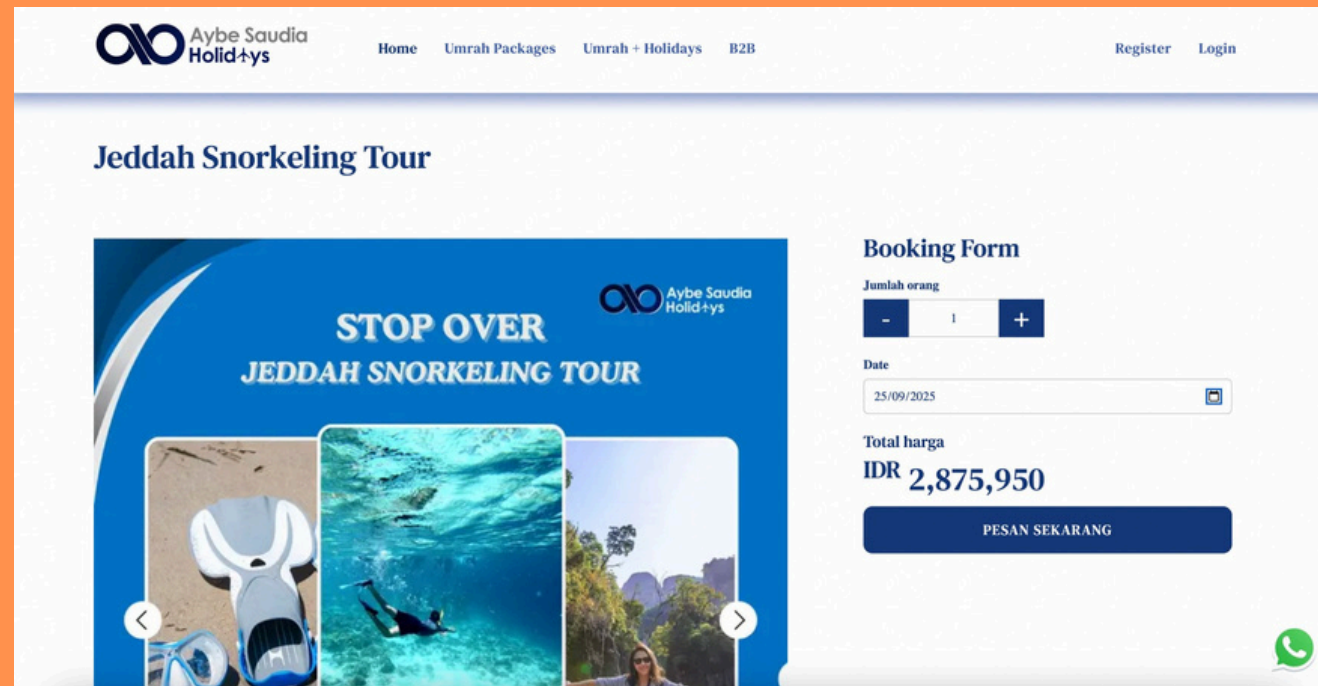

## Lead Software Engineer (Fullstack)

(Oct 2020 – Mar 2021, continued feature updates until 2024)

Framework : Laravel

<https://shafwahholidays.com>

**Framework : Laravel, Next.js**  
**<https://www.aybesaudiaholidays.com>**

Designed and built a full-featured travel booking platform for Umrah and stopover packages. The system includes a dynamic package management module, secure online payment integration, real-time booking with automated notifications, and an intuitive admin dashboard—enhancing both customer convenience and operational efficiency.

# Aybe Holidays

## Fullstack Developer

**(Nov 2024 – Mar 2025)**

Backend Development (**Laravel**) :

- **Architecture & API:** Designed and implemented RESTful APIs for package management, booking, and secure payment processing.
- **Security & Payments:** Integrated a secure payment gateway and ensured encryption of sensitive data.
- **Performance Optimization:** Optimized database queries.

Frontend Development (**Next.js**) :

- **User Interface:** Built a responsive, fast, and user-friendly booking interface for both desktop and mobile devices.
- **Admin Dashboard:** Developed a dashboard for administrators to easily update content, monitor orders, and track booking status.

**Integrations: Secure payment gateway, automated email service**

# Saudia Airlines FIT

Built a scalable backend platform for Saudia Airlines FIT, enabling FIT passengers to request tickets, secure payment processing, and efficient order management.

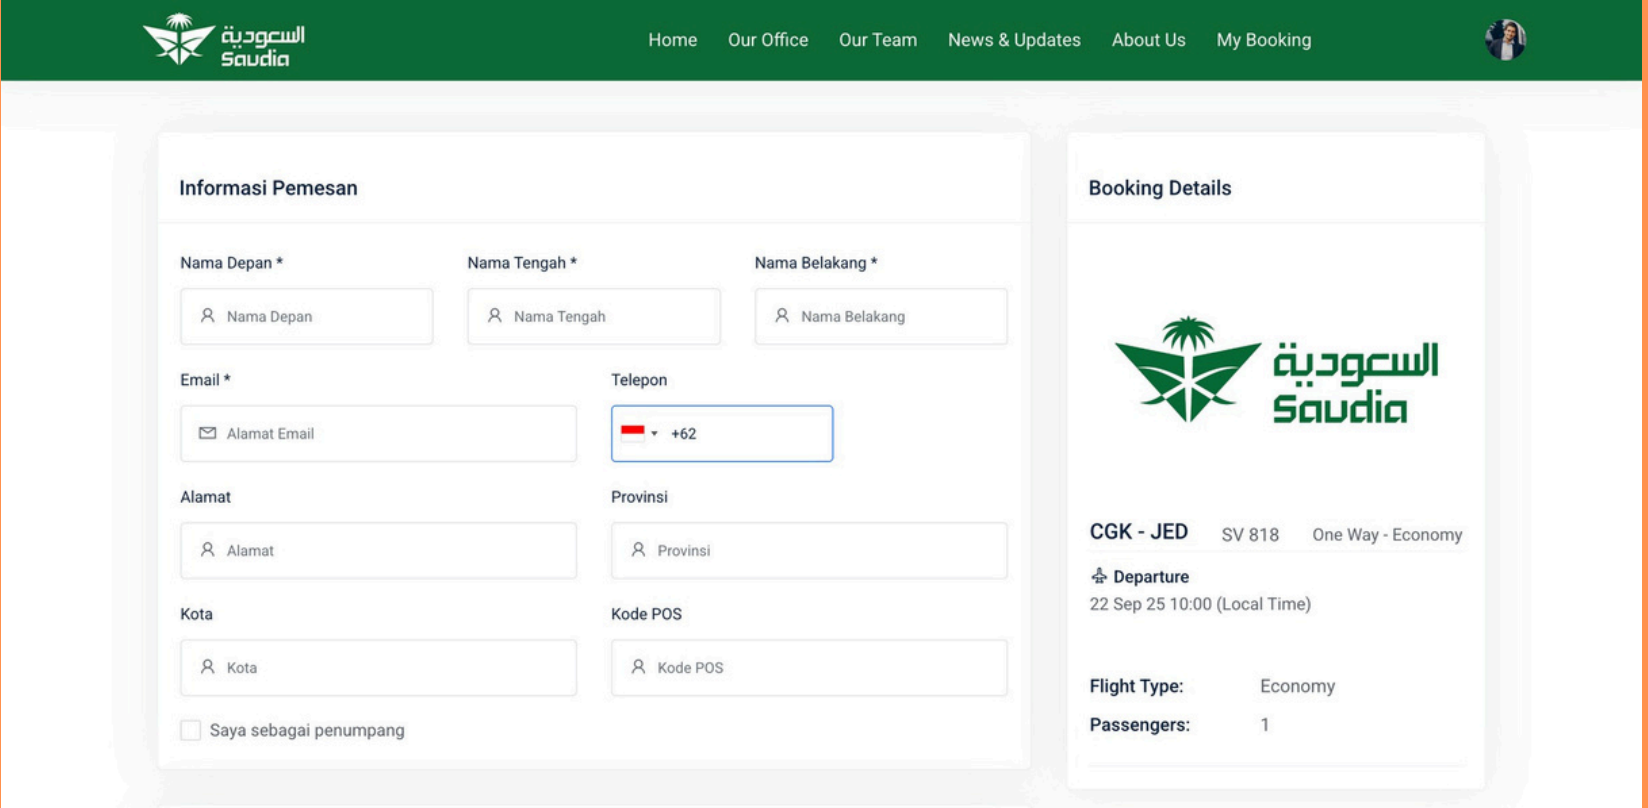

Backend Development :

- **Architecture & API Design:** Planned and implemented RESTful APIs to handle ticket requests, approval booking request and payment workflows.
- **Payment Security:** Connected to secure payment gateways and applied data encryption for sensitive customer information.
- **Order Management:** Developed modules for tracking and updating orders, including automated email notifications and status updates.
- **Performance Optimization:** Improve database queries to maintain fast response times.

**Integrations:** Payment gateway, real-time inventory service

## Backend Developer

Feb 2023 – Jun 2023

The screenshot displays the Saudia Airlines booking interface. The top navigation bar includes the Saudia logo and links for Home, Our Office, Our Team, News & Updates, About Us, and My Booking. The main content is divided into two sections: 'Informasi Pemesan' (Passenger Information) and 'Booking Details'. The 'Informasi Pemesan' section contains form fields for Nama Depan \*, Nama Tengah \*, Nama Belakang \*, Email \*, and Telepon. Below these are fields for Alamat, Kota, and Kode POS, along with a checkbox for 'Saya sebagai penumpang'. The 'Booking Details' section features the Saudia logo, flight information (CGK - JED SV 818 One Way - Economy), departure time (22 Sep 25 10:00 (Local Time)), flight type (Economy), and the number of passengers (1).

**Framework : Laravel**  
<https://saudia.id/>

# Tugu Claim

Provided support, maintenance, and ongoing enhancements for an insurance claim system designed to handle compensation requests from passengers affected by Pelita Air flight delays. The system streamlined claim submissions while maintaining strict data security standards.

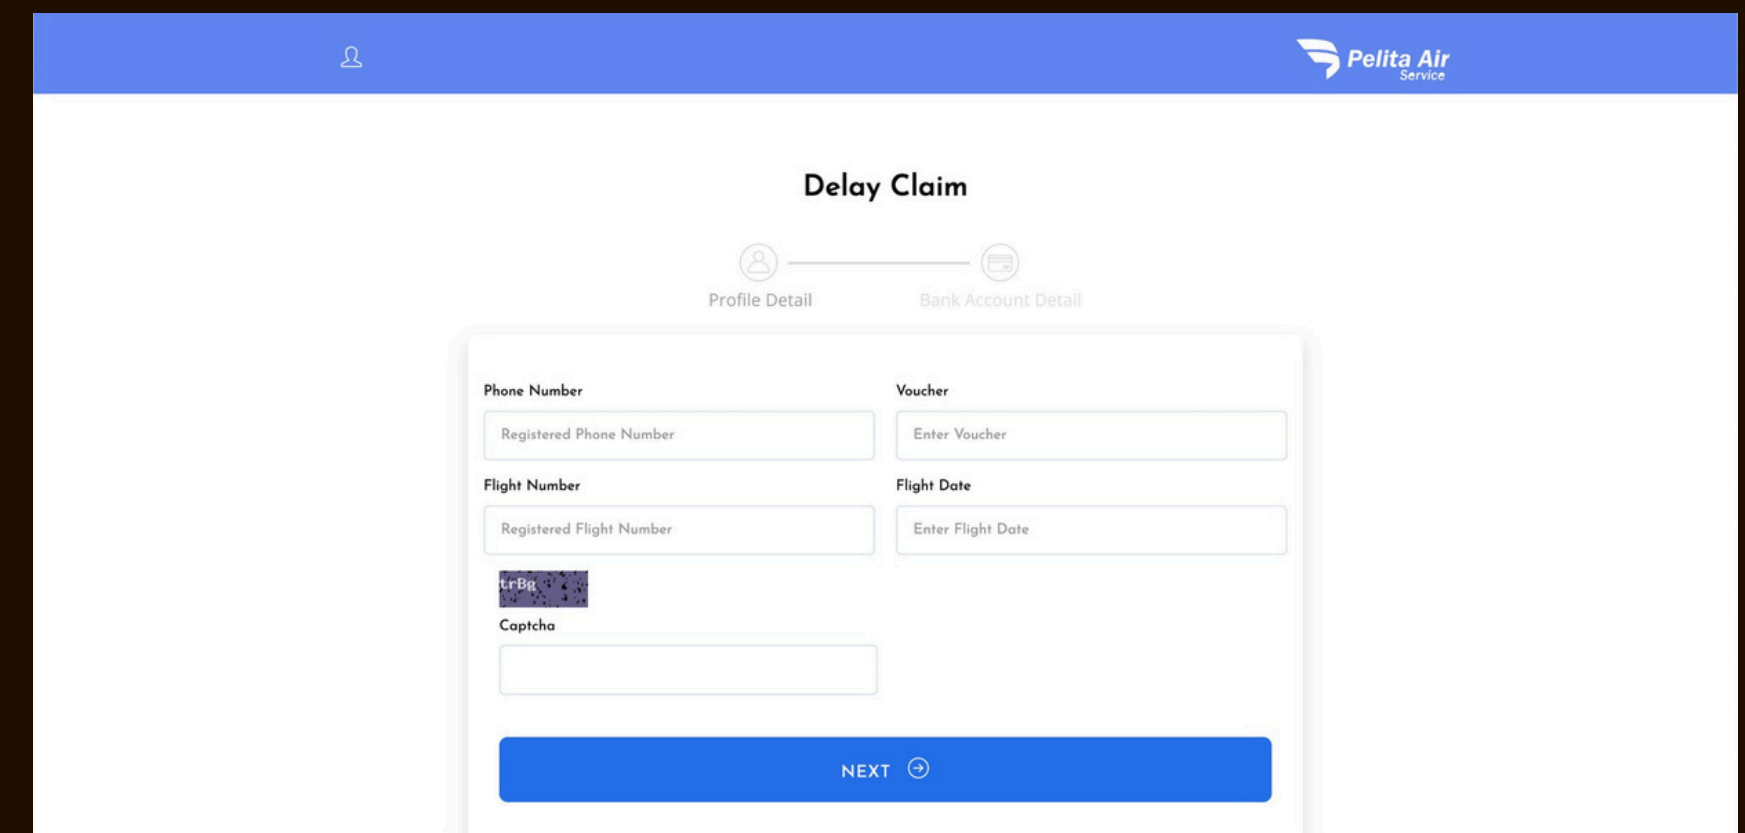

Backend Development & Maintenance :

- **System Optimization:** Fixed bugs, improved performance, and ensured system stability even as claim volumes increased.
- **Data Security:** Implemented strong validation and encryption practices to safeguard sensitive user information.
- **Feature Updates:** Collaborated with the internal team to add new features and deliver regular updates through 2025.

**Integrations:** Secure email notifications for claim status, automated reporting modules

## Support Backend Developer

Oct 2020 – Dec 2020, frequent feature updates until 2025

The screenshot shows a web interface for a 'Delay Claim' form. At the top right is the 'Pelita Air Service' logo. Below the title 'Delay Claim', there are two navigation options: 'Profile Detail' and 'Bank Account Detail'. The main form area contains several input fields: 'Phone Number' with a sub-label 'Registered Phone Number', 'Voucher' with a sub-label 'Enter Voucher', 'Flight Number' with a sub-label 'Registered Flight Number', and 'Flight Date' with a sub-label 'Enter Flight Date'. There is also a 'Captcha' field with a small image of a captcha. At the bottom of the form is a blue button labeled 'NEXT' with a right-pointing arrow.

**Framework : PHP**

**<https://voucher.tuguclaim.web.id>**

# Plaza Premium Lounge System

Designed and built a comprehensive airport lounge management platform with modules for staff scheduling, digital check-in using barcode scanning, and integrated billing—enabling faster processing and an improved user experience.

## Backend Development :

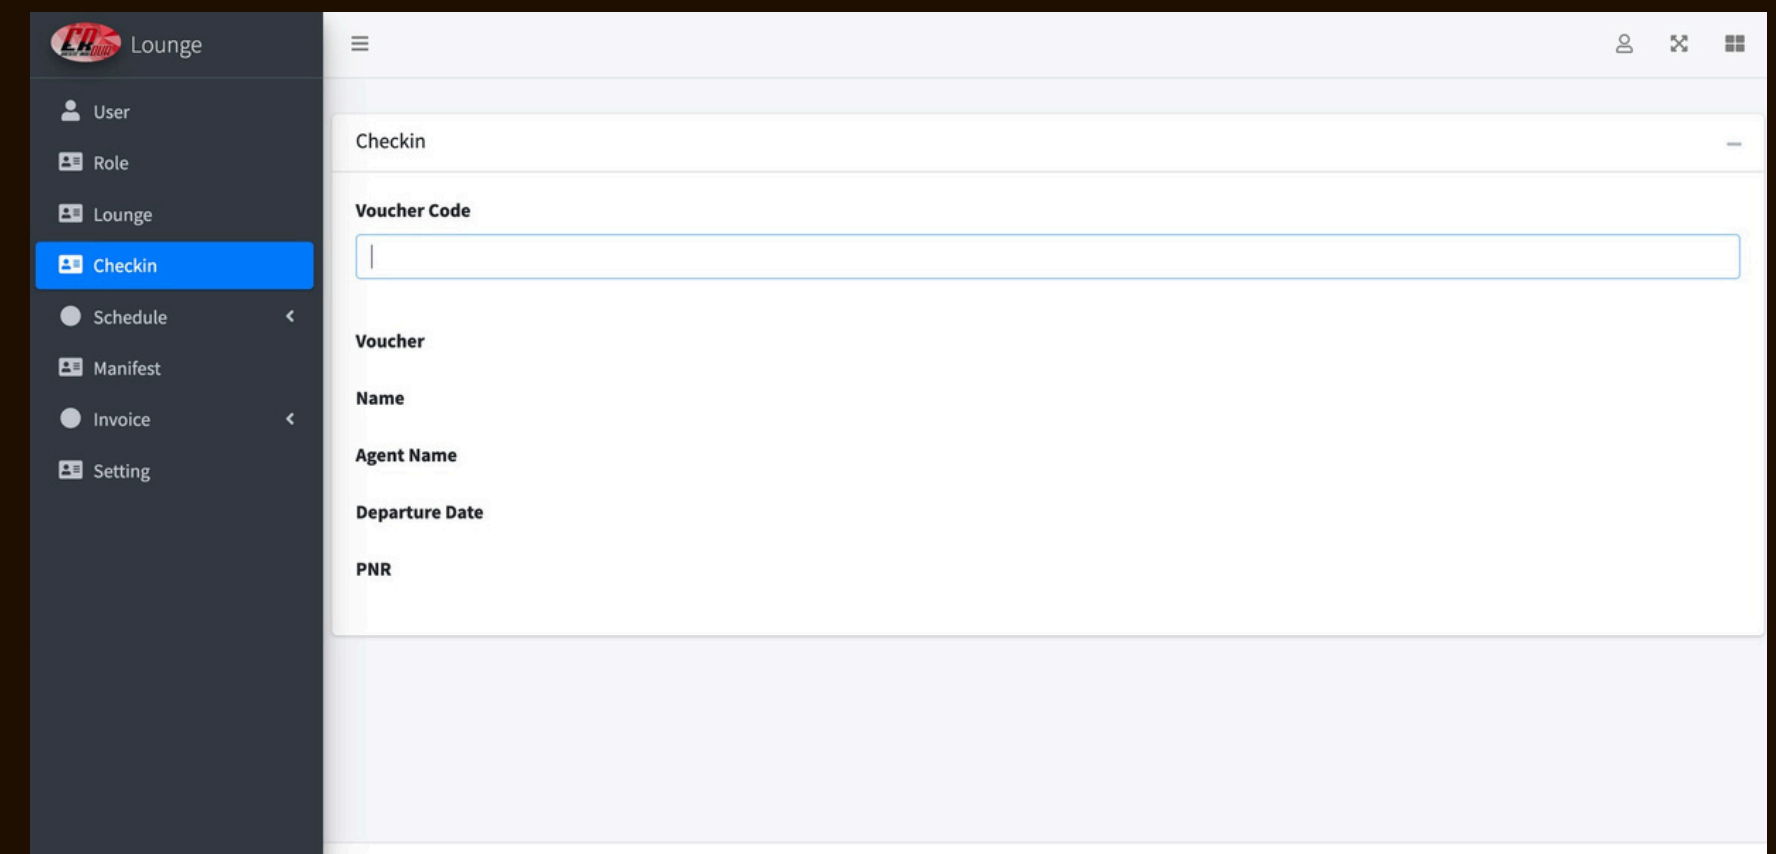

- **Planned and implemented RESTful APIs** to handle staff scheduling, passenger check-in, and billing workflows.
- **Designed relational database** schema to manage branch, customer, and financial transactions efficiently.
- **Integrated barcode / QR scanner** support and secure authentication for real-time lounge access validation.
- **Optimized database queries** and caching to ensure smooth operation during peak airport traffic.

## Frontend Development :

- **Built a responsive, role-based admin dashboard** for lounge managers to monitor schedules, check-ins, and revenue in real time.
- **Implemented intuitive forms and tables** for quick data entry and clear status tracking.

# Fullstack Developer

Jan 2025 – Feb 2025

**Framework : Laravel**

**<https://lounge.simpuldata.id>**

**Integrations: Barcode scanner support, payment gateway, automated email notifications, secure authentication & authorization, modules based**

# DSS Penabulu - STPI

Designed and developed a web-based survey platform to collect and analyze tuberculosis-handling reports from across Indonesia. The system provides secure data submission, real-time reporting, and centralized management to support effective nationwide health monitoring.

## Backend Development:

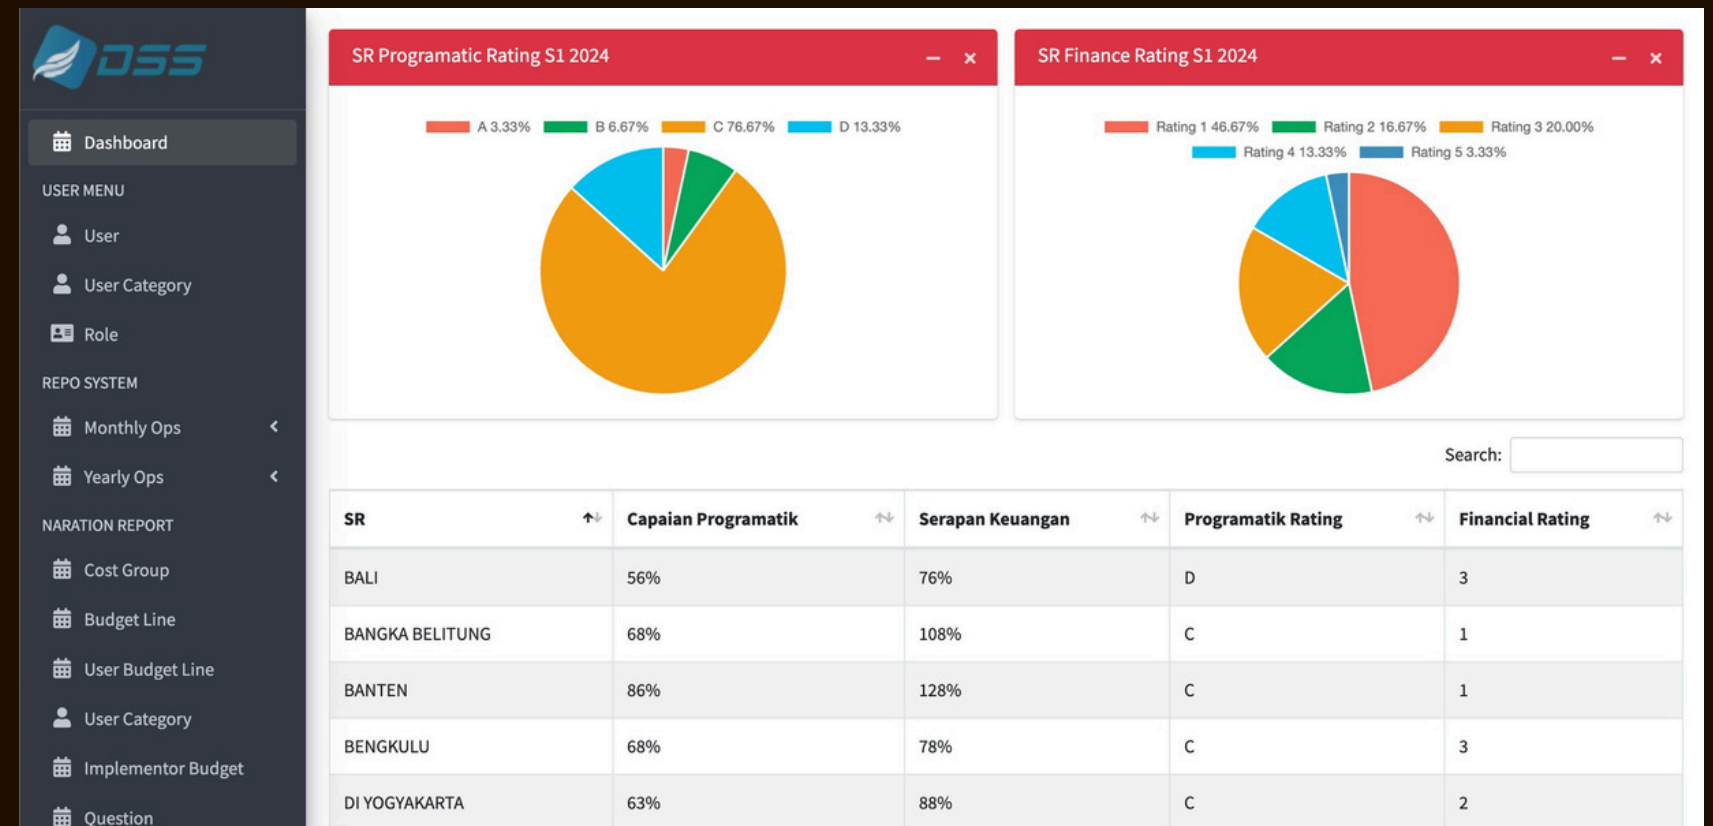

- **Architecture & API:** Designed and implemented RESTful APIs for TB survey report management, including data submission modules, user management, and authentication systems.
- **Security & Data Handling:** Developed encryption mechanisms and data validation to protect patient information and maintain report integrity.
- **Real-time Reporting:** Built a real-time data processing system to display statistics and report charts instantly.
- **Performance Optimization:** Optimized database queries and caching to ensure fast processing of large-scale national data.

## Frontend Development:

- **User Interface:** Designed a responsive and user-friendly web interface for report submission and data visualization.
- **Admin Dashboard:** Developed a centralized dashboard enabling administrators to monitor TB trends and manage user access nationwide.

# Fullstack Developer

## Jan2024-May2024

**Framework : Laravel**  
**<https://dss.simpuldata.id>**

**Integrations: Secure data submission, real-time reporting, centralized health-monitoring management**

# Kalselpark

Designed and built a voucher booking and reservation platform for Kalselpark, covering voucher purchases for park entry, glamping accommodations, and attraction reservations. The system provides a seamless customer experience while improving operational efficiency for park management.

## Backend Development (Laravel) :

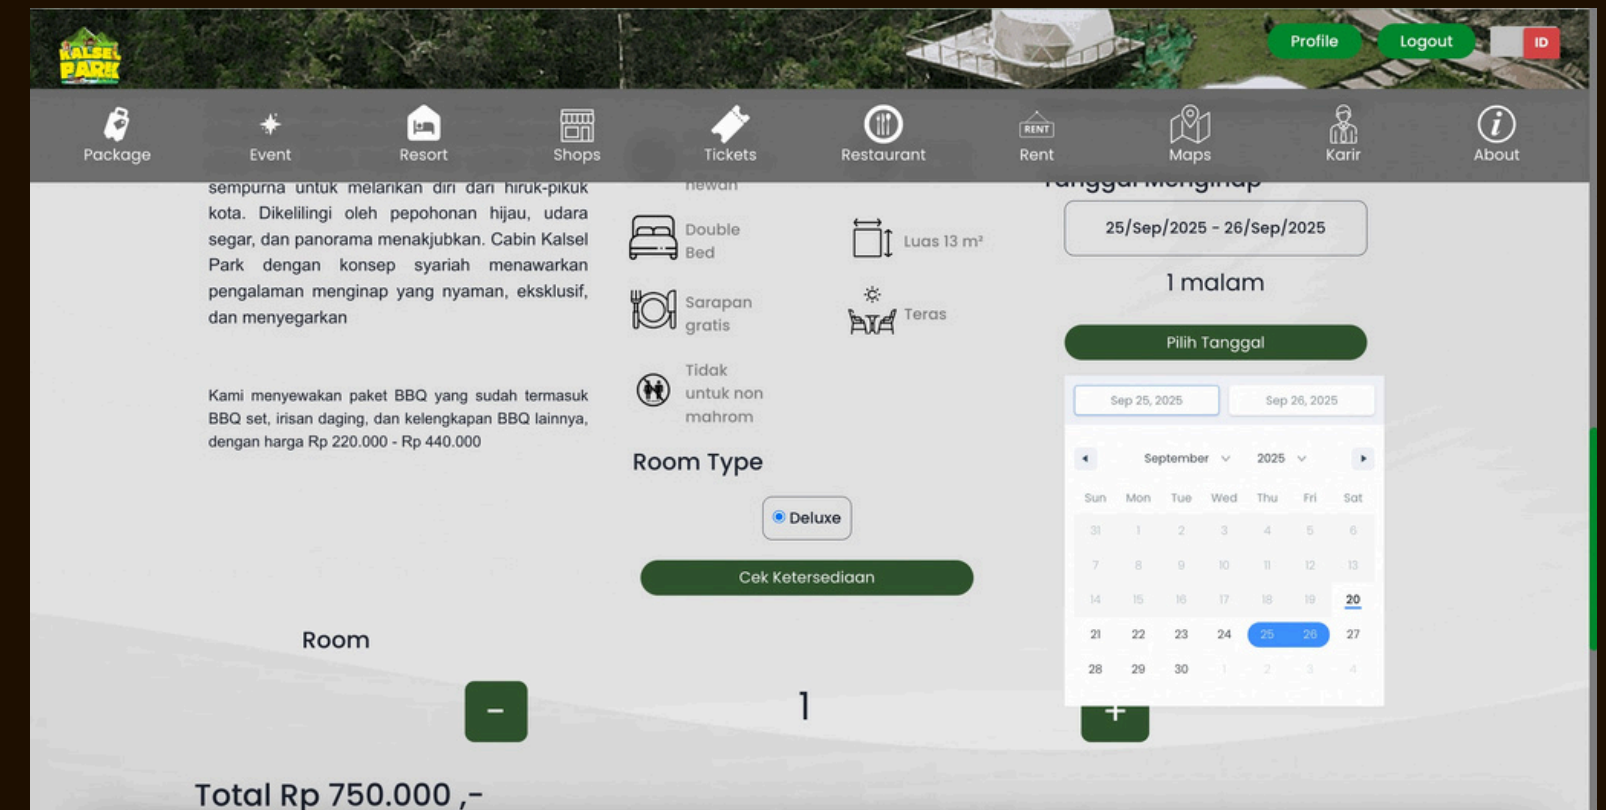

- **Architecture & API:** Designed and implemented RESTful APIs for voucher management, room reservations, payment processing, and booking workflows.
- **Security & Data Handling:** Developed relational database schemas and encryption mechanisms to secure transactions and protect customer information.
- **Real-time Booking:** Built real-time processing for voucher booking and validation to ensure accurate availability and instant confirmation.
- **Performance Optimization:** Optimized database queries and caching to handle high booking volumes during peak seasons.

## Frontend Development (React.js) :

- **API Integration:** Collaborated with the frontend team to integrate APIs and ensure smooth data flow between backend services and the user interface.
- **User Interface Support:** Supported the implementation of a responsive and user-friendly voucher booking interface for both web and mobile devices.

## Backend Developer

Feb 2025 – Jun 2025

Framework : Laravel, React.js

<https://kalselpark.com>

**Integrations: Secure payment gateway, real-time voucher booking management, encrypted customer data**

# Collective Data

Developed a data marketplace for purchasing and exploring diverse datasets such as geographic, survey, and trend data—providing secure browsing, easy purchasing, and seamless data delivery.

## Backend Development :

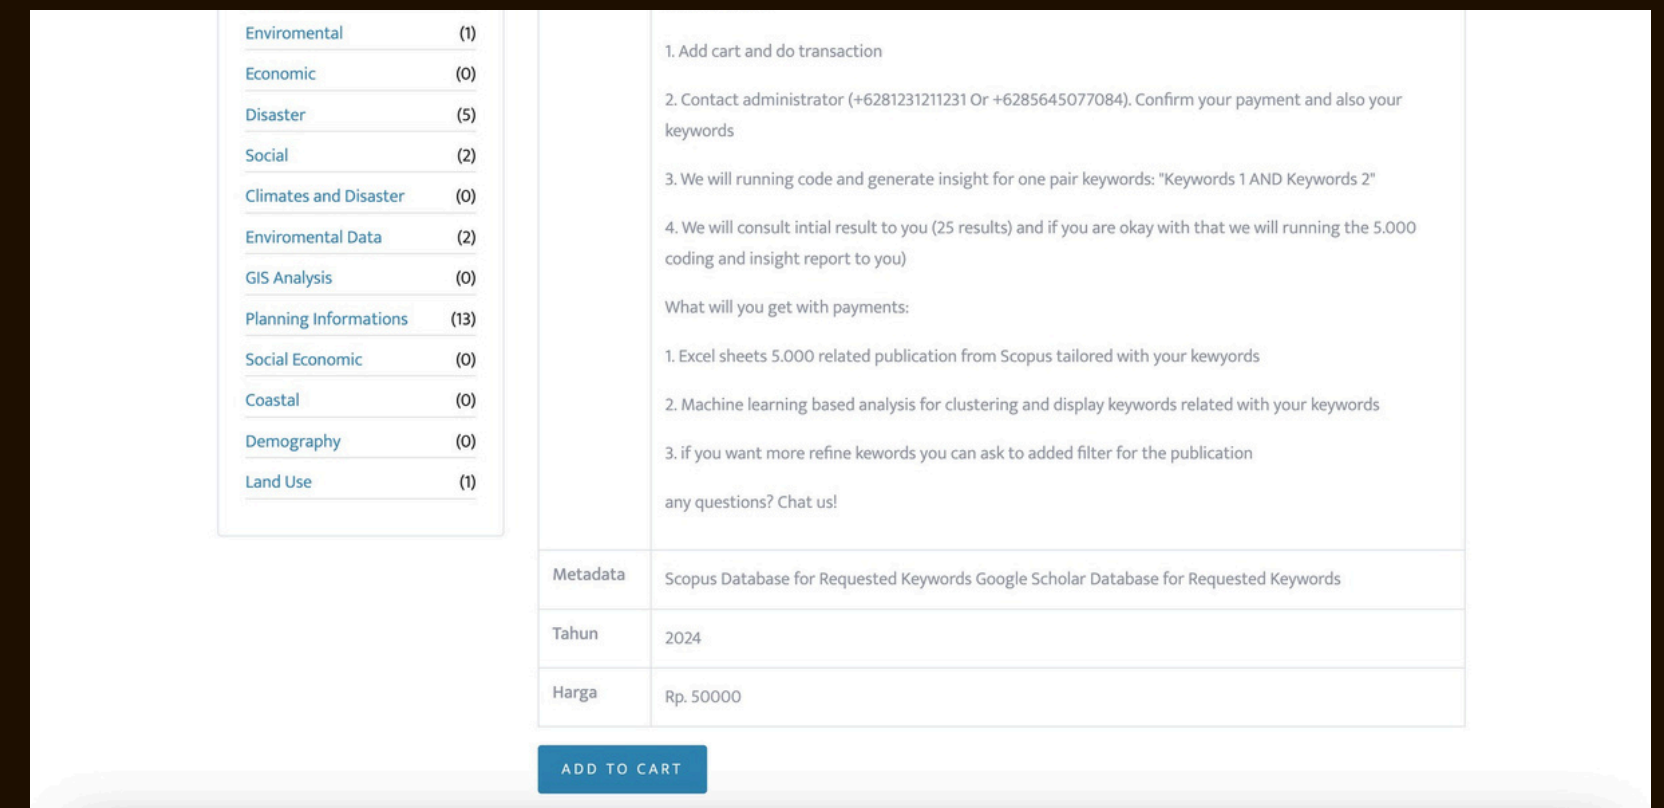

- **Architecture & API:** Designed and implemented RESTful APIs for dataset management, user authentication, and secure transactions.
- **Security & Data Handling:** Built relational database schemas and applied encryption to protect customer information and purchased data.
- **Performance Optimization:** Optimized queries and caching to ensure fast dataset searches and downloads.

## Frontend Development :

- **User Interface:** Created a responsive and intuitive marketplace interface for browsing, purchasing, and downloading datasets.
- **Admin Dashboard:** Developed tools for administrators to manage datasets, monitor purchases, and control user access.

**Integrations: Secure payment processing, encrypted data delivery, dataset search and filtering**

## Fullstack Developer Oct 2022

**Framework : Laravel**

**<https://collectivedataindonesia.com>**

# IKA FAHUTAN ULM

Developed an alumni association platform for the Forestry Faculty of Universitas Lambung Mangkurat, featuring alumni registration, event ticket QR systems, article and news publishing, and online donation management.

## Backend Development :

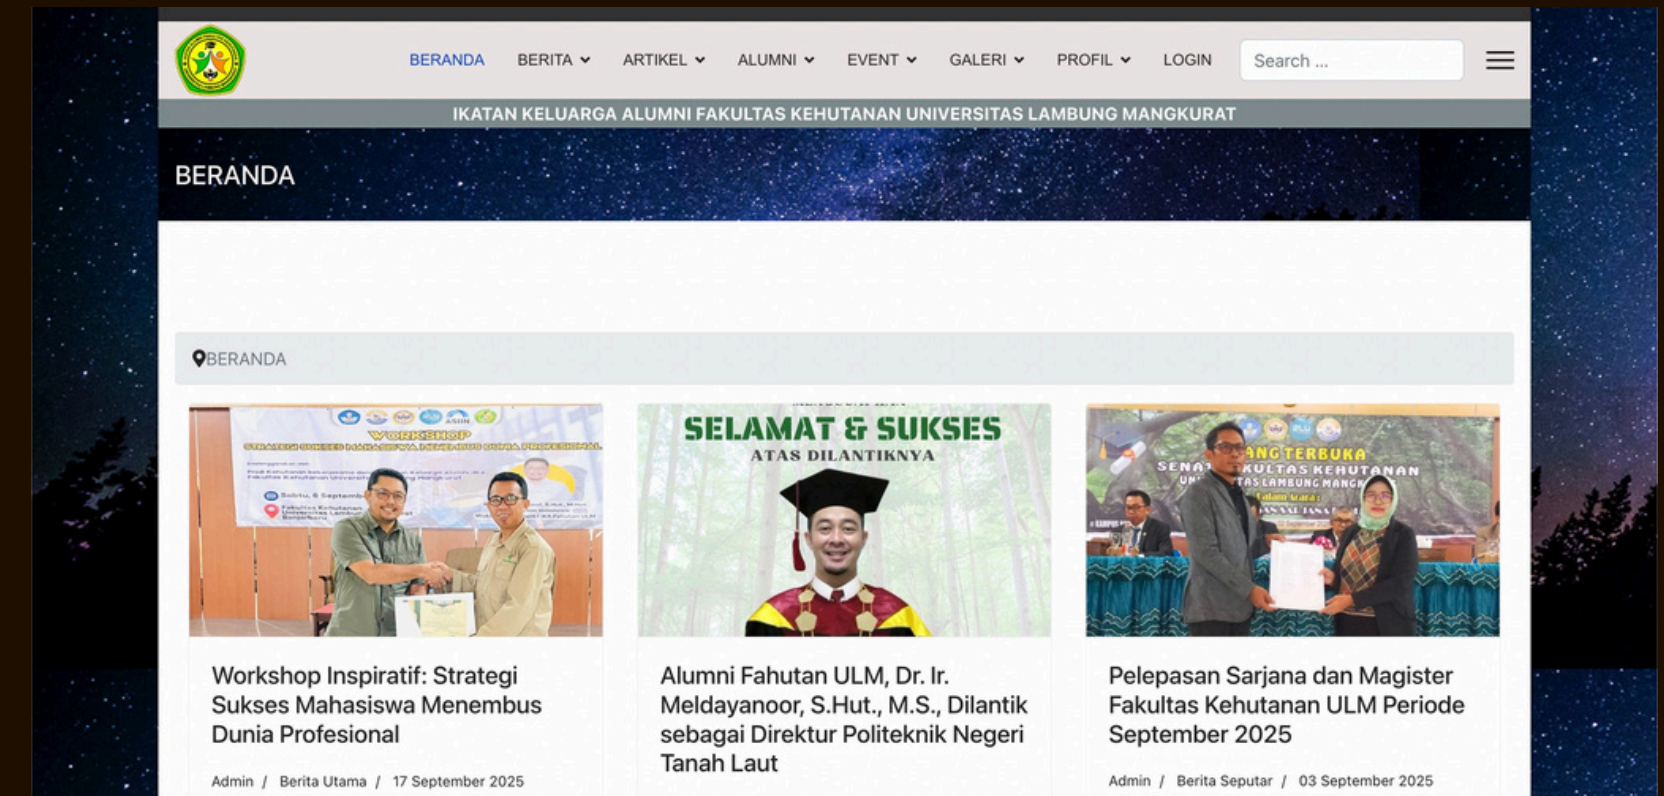

- **Architecture & API:** Designed and implemented RESTful APIs for alumni registration, ticket QR generation/validation, content management, and donation processing. **Security & Data Handling:** Built relational database schemas and applied encryption to protect alumni data, transactions, and ticket information. **Performance Optimization:** Optimized queries and caching for fast content delivery and high-traffic event ticketing.

## Frontend Development :

- **User Interface:** Created a responsive and user-friendly website for alumni to register, access news, and purchase event tickets.
- **Admin Dashboard:** Developed an intuitive dashboard for managing alumni data, ticket sales, article publishing, and donation tracking.

# Fullstack Developer

Jun 2023

**Framework : Laravel**

**<http://ikafahutanulm.org>**

**Integrations: QR code ticketing system, secure payment gateway, alumni data management, online donation features**

# White Rock Bali Booking Map

## Frontend Developer

Developed a real-time interactive booking platform for White Rock Bali that allows guests to view and reserve beach areas directly from a live map interface.

Dec 2022

### Frontend Development :

- **Interactive Map:** Implemented a dynamic beach area map with real-time availability updates, enabling users to select and book specific spots visually.
- **Responsive UI:** Designed a seamless, mobile-friendly interface for smooth booking experiences across devices.
- **API Integration:** Connected to backend booking APIs to fetch availability data, process reservations, and update map statuses instantly.

**Integrations:** Real-time map interaction, live availability updates, responsive design

**Framework :** React.js

<https://whiterockbali.com/booking>

# Indotama Global Services Indonesia

Developed a corporate website for an air transportation company providing passenger and cargo services, featuring an order request system integrated with email notifications.

## Backend Development :

- **Order Request Handling:** Built a system to manage transportation inquiries and automatically forward order requests to the company's email for processing.
- **Admin Panel:** Implemented a content management interface for updating flight services, schedules, and company information.

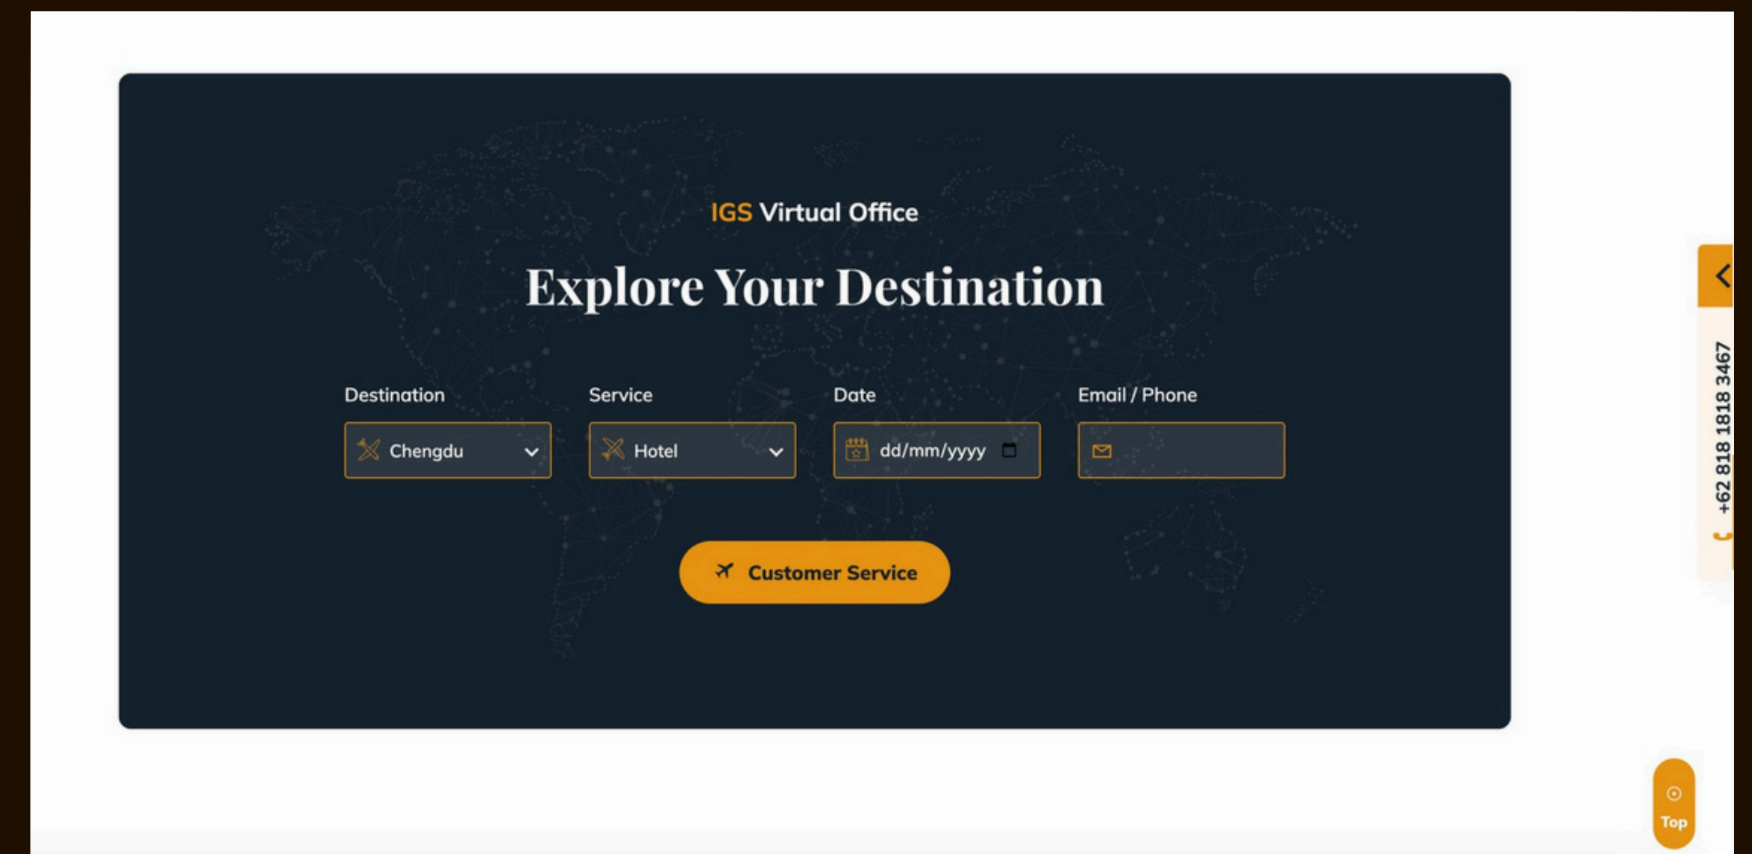

## Frontend Development :

- **Responsive Design:** Created a modern, user-friendly interface to showcase services and facilitate quick order submissions across desktop and mobile devices.

**Integrations:** Real-time map interaction, live availability updates, responsive design

## Fullstack Developer

Nov 2022

Framework : Laravel

<https://igs-indonesia.com>

# Bareca Media

Built a professional e-learning and video platform integrated with the Indonesia Smart Card (Kartu Pintar) system for product claiming and user access management.

## Backend Development (Laravel)

- **Smart Card Integration:** Developed APIs to validate Indonesia Smart Card credentials and manage product claim processes.
- **Content Management:** Implemented backend logic for managing courses, professional video content, and user enrollments.
- **Secure Transactions:** Designed database schemas and encryption mechanisms to protect user data and course purchase details.
- **Payment & Access Control:** Enabled secure payment workflows and automated access rights for purchased content.

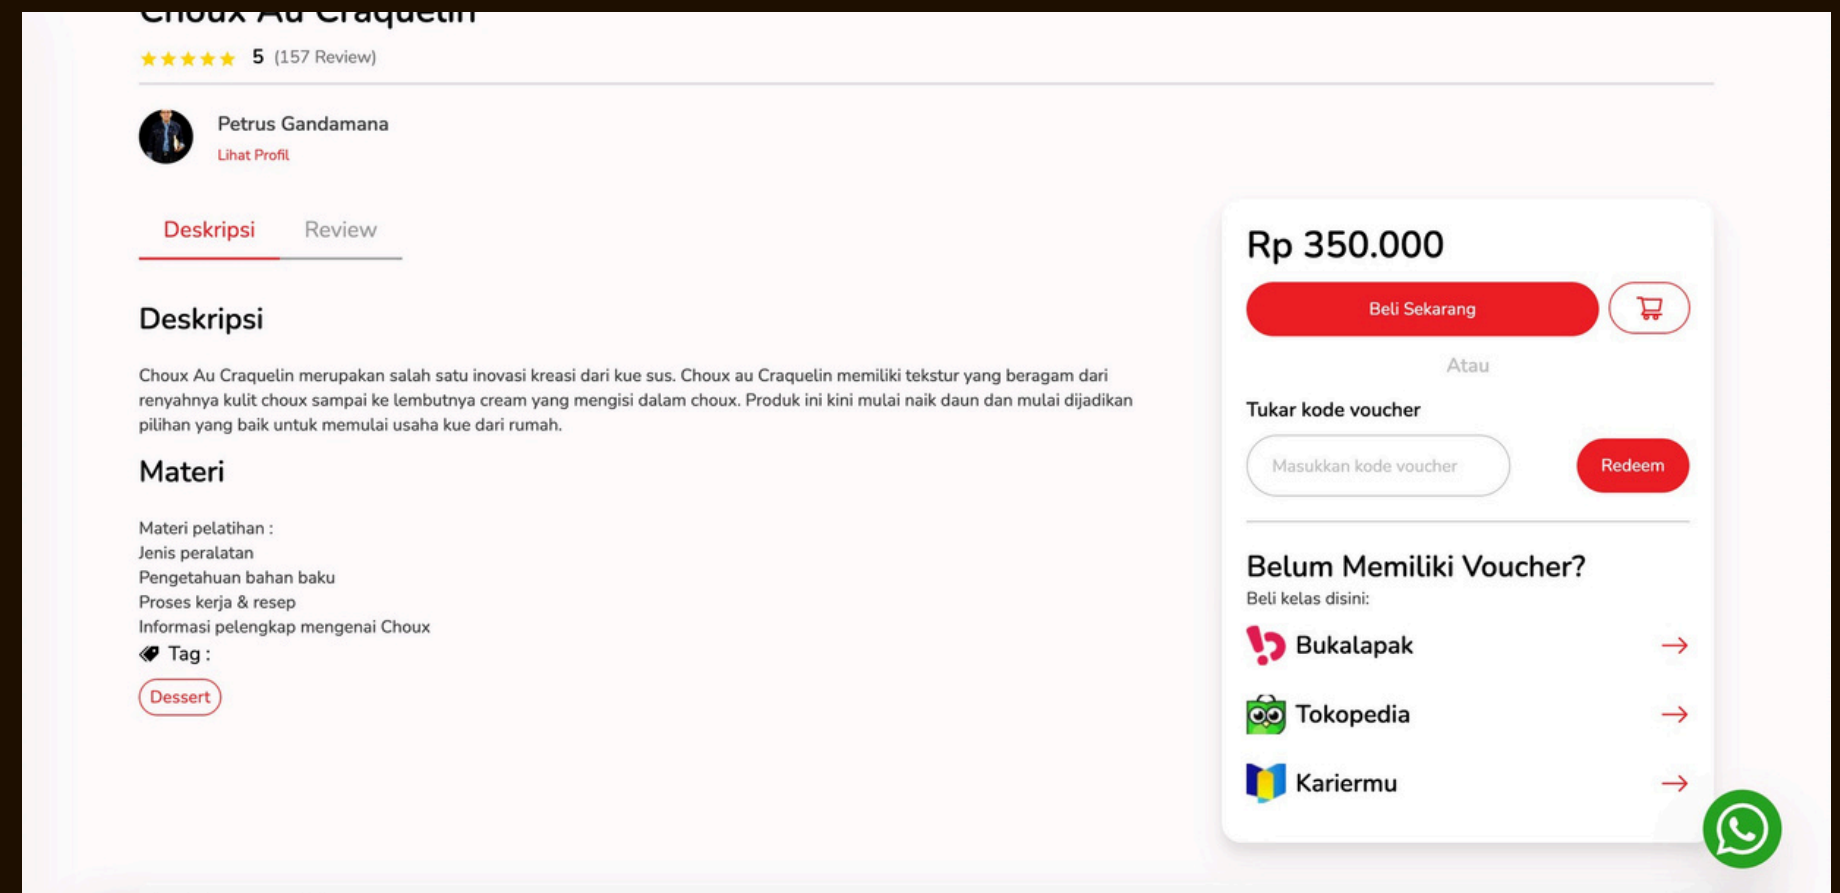

## Frontend Collaboration (React.js)

- Worked closely with the frontend team to ensure seamless API integration for real-time course access and product claim validation.

**Integrations:** Indonesia Smart Card product claiming, secure course management system, real-time content access

## Backend Developer

Mar - Apr 2022

**Framework : Laravel, React.js**  
<https://barecamedia.com/>

# Lerero Marketplace

Contributed to the development of an Australian e-learning marketplace enabling users to browse, purchase, and access online courses.

## Backend Development (NestJS)

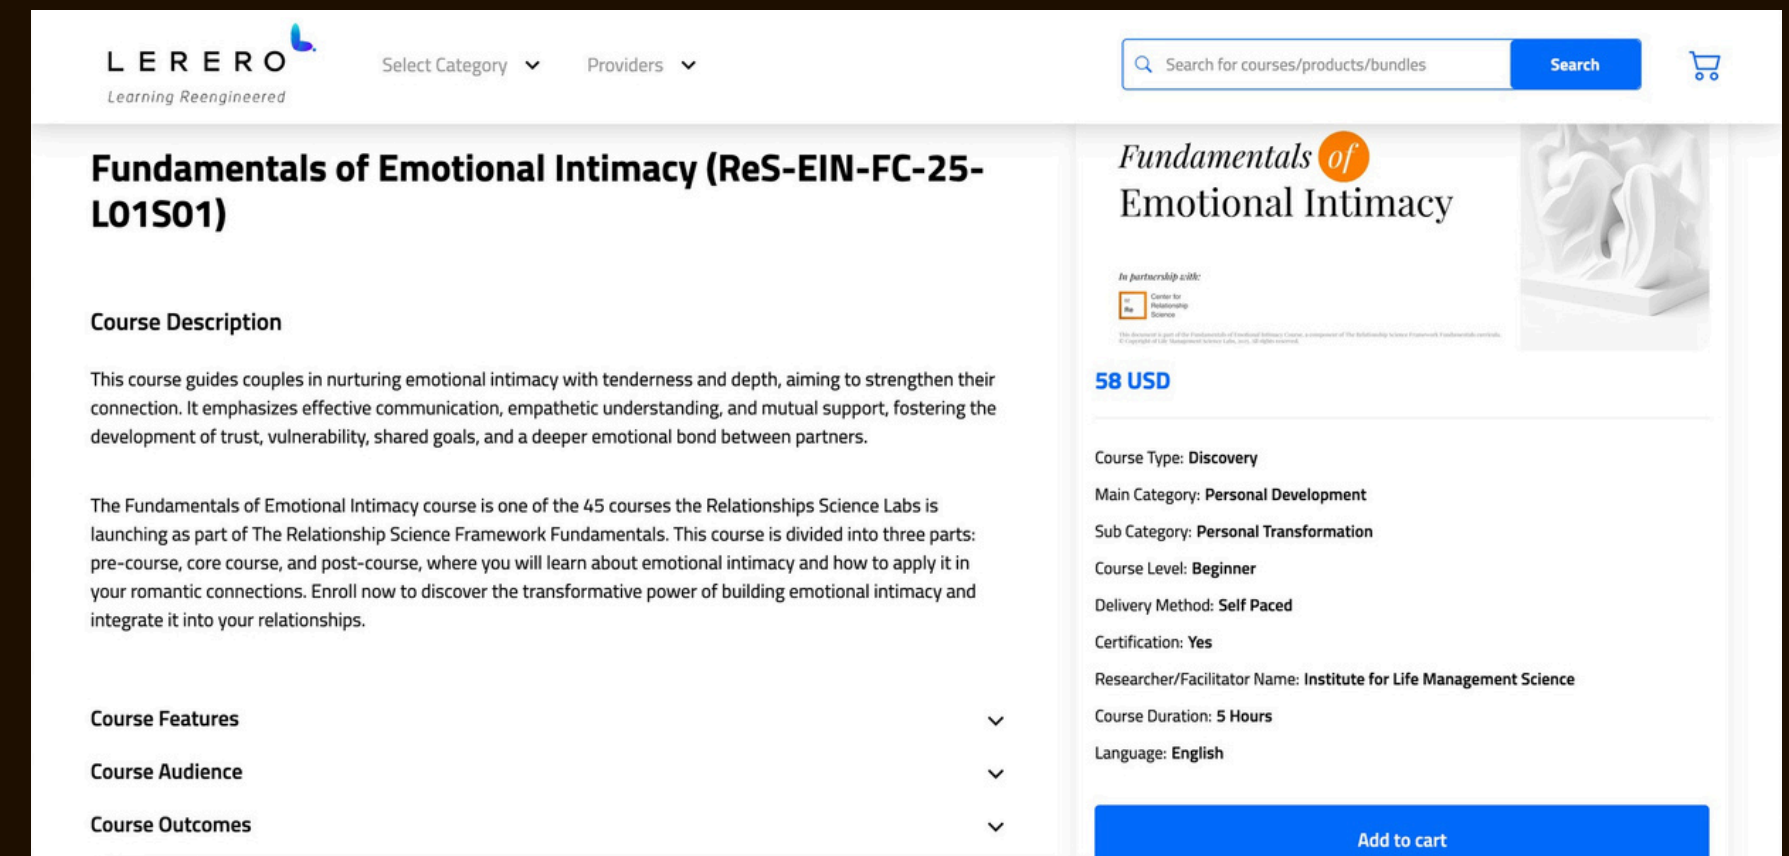

- **API Maintenance & Enhancement:** Supported the improvement of RESTful APIs for course management, user authentication, and payment processing.
- **Database Optimization:** Assisted in refining database queries to enhance performance and scalability for a growing user base.
- **Secure Transactions:** Implemented validation and encryption mechanisms to ensure safe payments and protect sensitive user information.
- **Feature Support:** Helped integrate new features such as course recommendations and real-time enrollment updates.

## Frontend Collaboration (Next.js)

- Worked alongside the frontend team to ensure seamless API integration and consistent data flow across the platform.

# Support Backend Developer

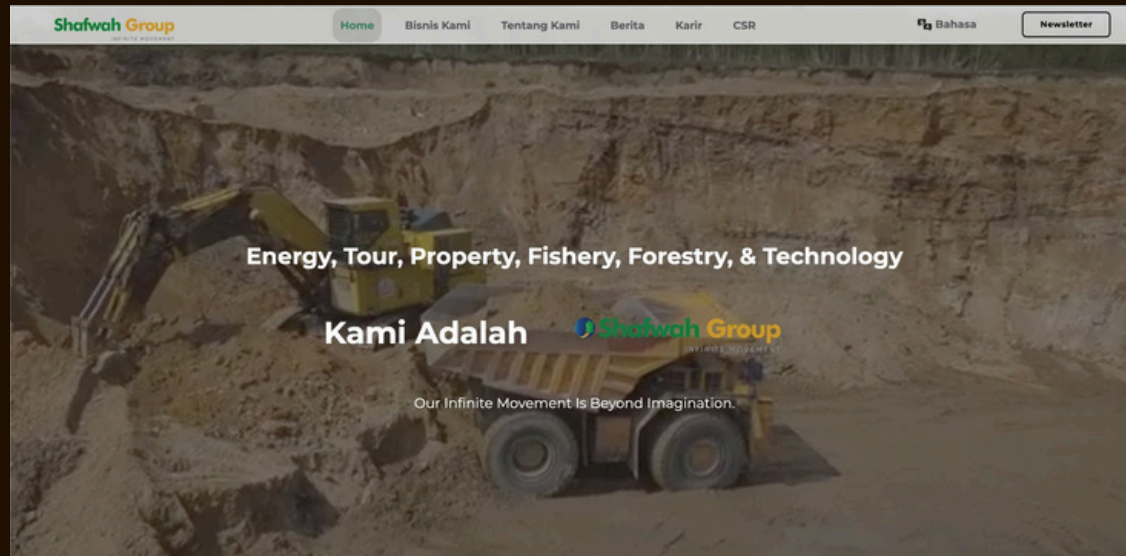

Jan 2023 – Apr 2023

**Framework: NestJS, Next.js**

**Integrations: Secure payment gateway, real-time enrollment management, scalable course management system**

# Shafwah Company Profile

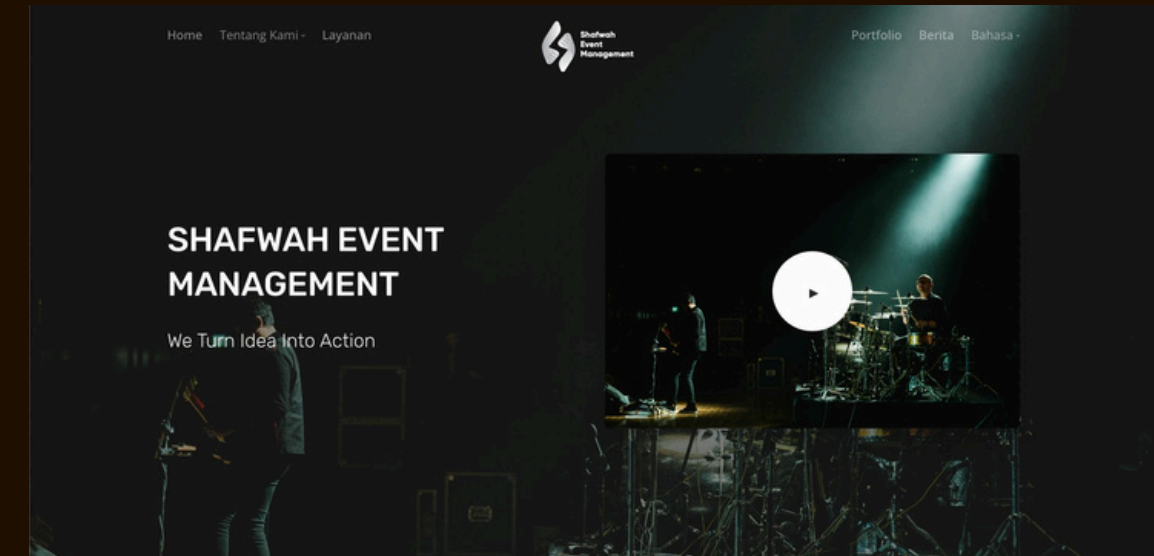

## Shafwah Group

Designed and led the development of Shafwah Group's corporate profile website, presenting company information, services, and business portfolio through a modern, responsive interface. **Feb 2023**

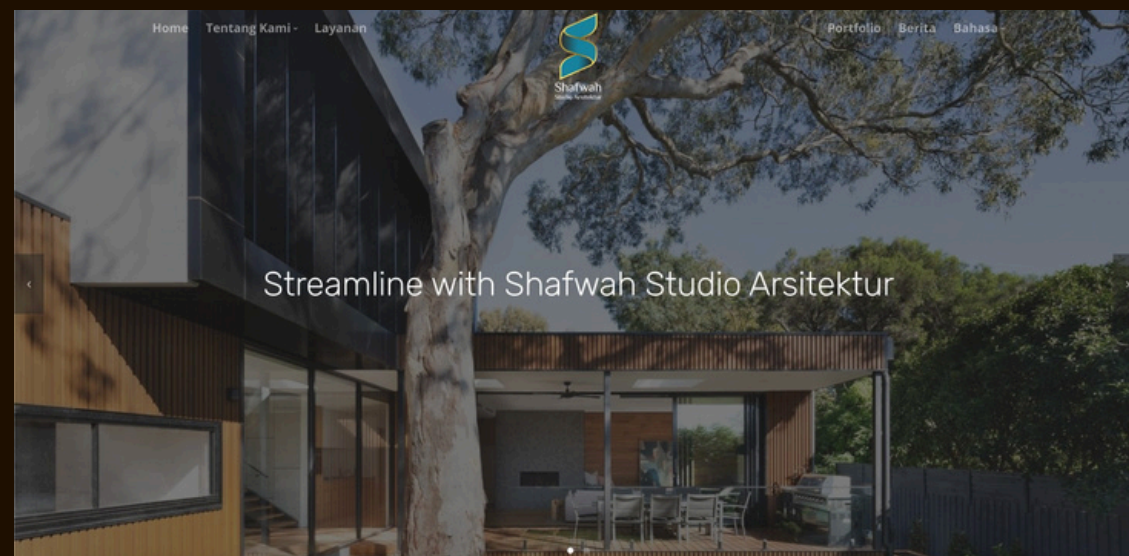

## Shafwah Golden Technology

Developed a corporate web portal for Shafwah Golden Technology, showcasing company profile, technology services, and key projects with an intuitive navigation and modern design. **Apr 2023**

## Shafwah Event Management

Developed a professional web platform for Shafwah Event Management to present its company profile, event services, and project highlights with an elegant, device-friendly interface. **Aug 2023**

## Shafwah Studio Arsitek

Developed a professional web platform for Shafwah Studio Arsitek to present company profile, architectural solutions, and project highlights with a clean design and seamless navigation. **May 2023**

<http://shafwahgroup.com>

<http://shafwahtechology.com>

<http://shafwahevent.com>

<http://shafwahstudio.com>

Framework: Laravel

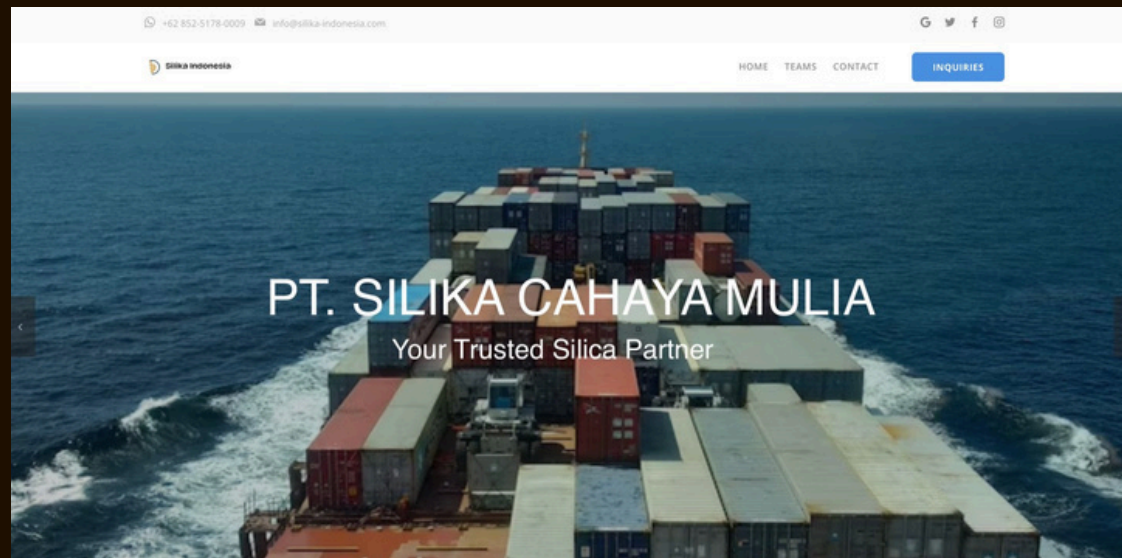

# Company Profile

## Aletheia

Oct 2020 – Nov 2020

Designed and built a responsive institutional web profile for Aletheia School, showcasing the school's profile, academic programs, and announcements while providing an engaging and user-friendly browsing experience.

## Silika Indonesia

Aug 2023

Developed a professional web platform for PT Silika Indonesia to present its company profile, service offerings, and project portfolio with clean design and seamless navigation.

<https://about.sttaletheia.ac.id>

<https://silikaindonesia.com>

Frame Work: Laravel

## Crawling Solana NFT

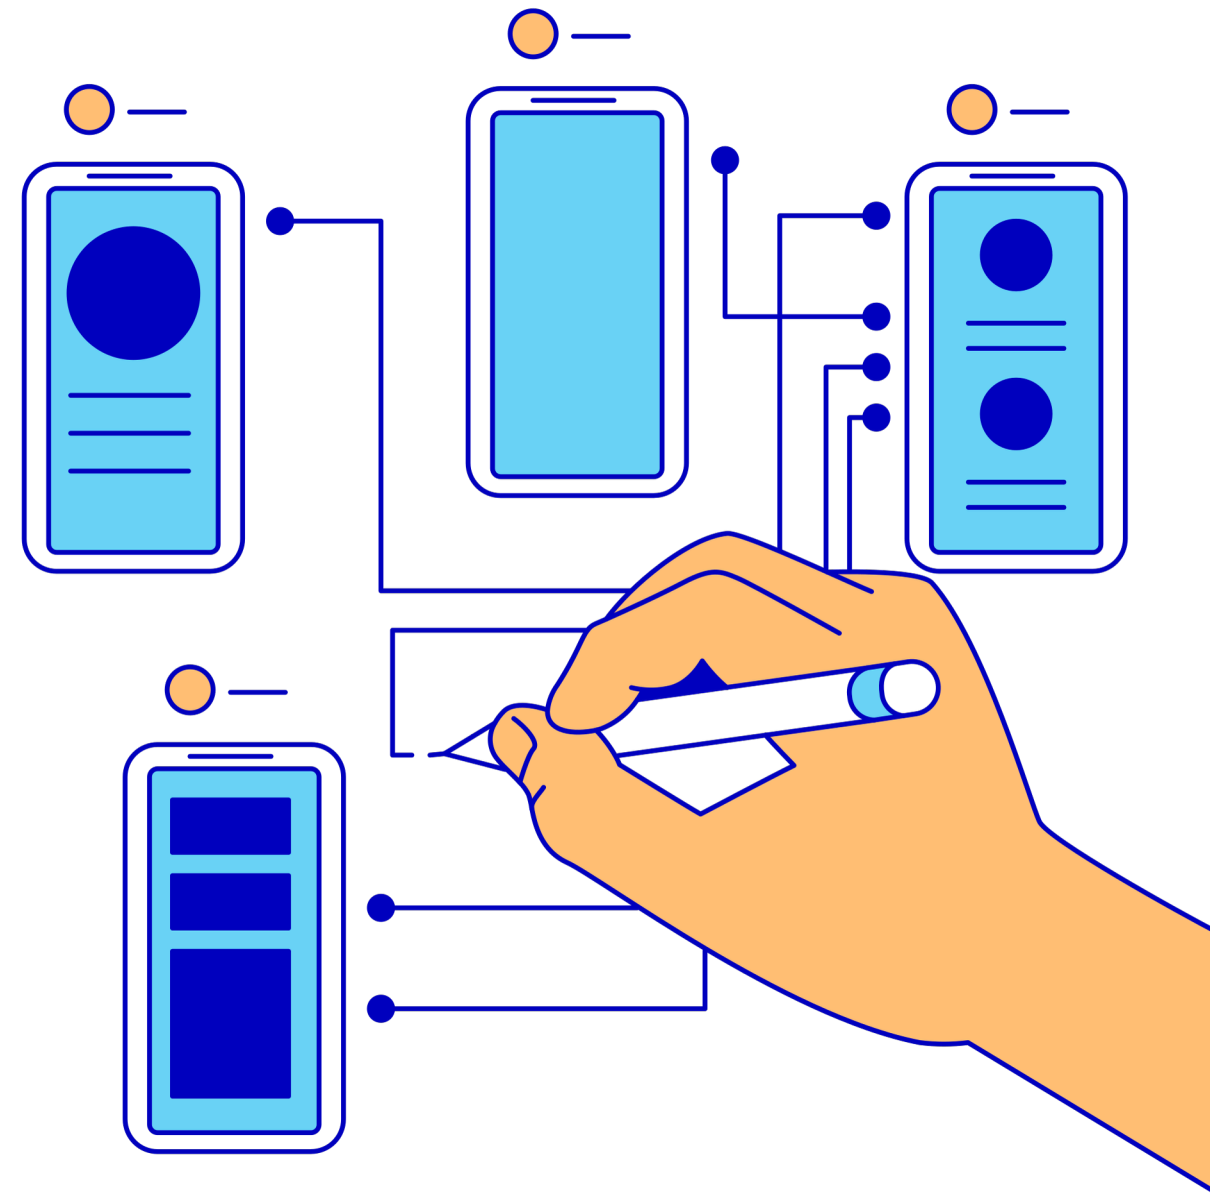

Mar 2022

Developed an internal system that periodically (every 6–24 hours) collects and updates NFT data from solanart.io and magiceden.io, enabling continuous monitoring.

Framework : Laravel

# My Portfolio

## Mobile Application Projects

# Golf Traveller

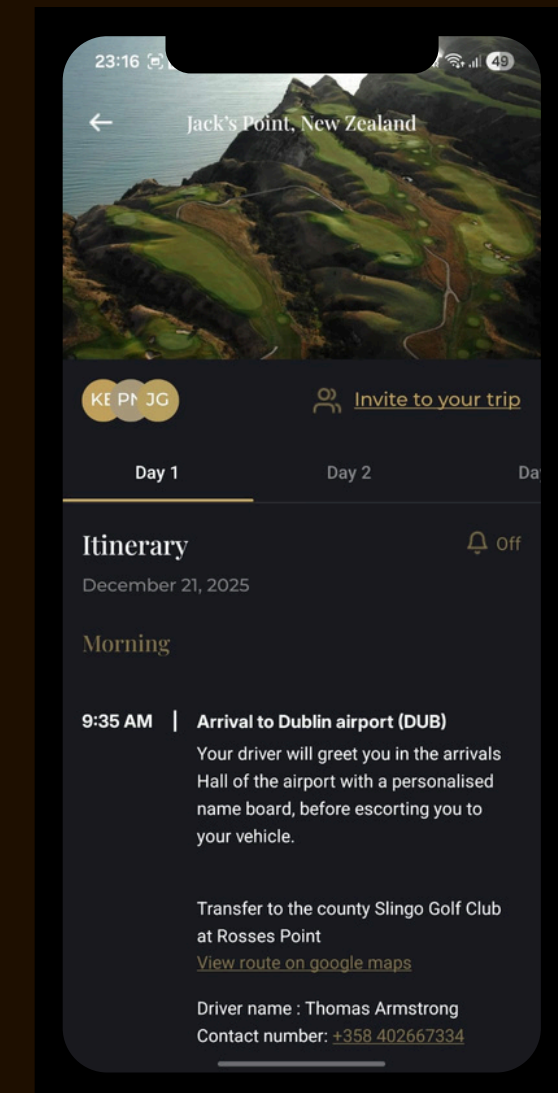

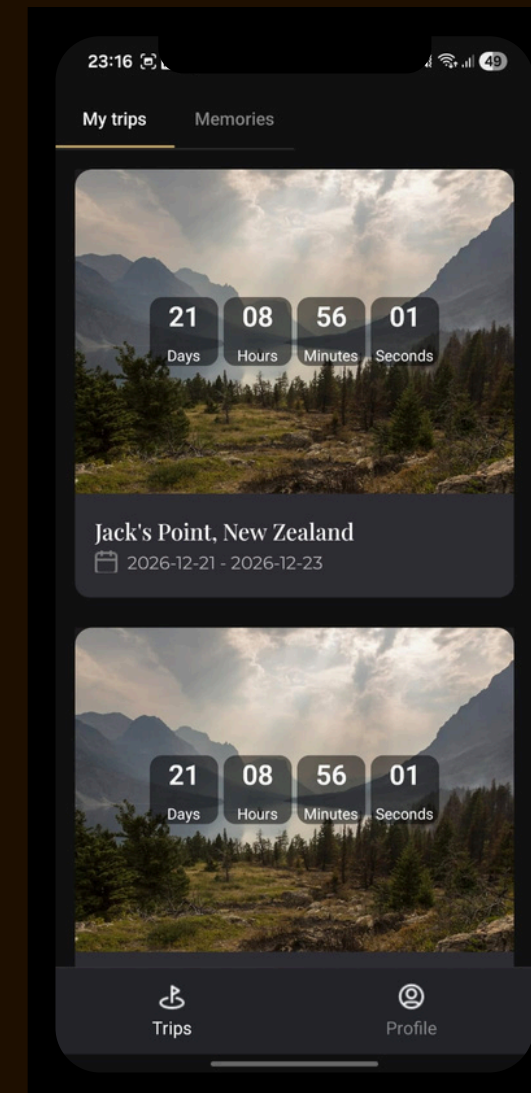

Dec 2025 – Recent

Golf Traveller App is a mobile application designed to help users plan, manage, and enjoy premium golf travel experiences. The app allows users to explore curated golf trips, view upcoming journeys with countdown timers, and manage detailed itineraries day by day.

Mobile Development :

- **App Architecture & Features:** Built a cross-platform app for iOS and Android enabling service discovery, booking, and order tracking.
- **API Integration:** Integrated backend APIs for user authentication, service listings, and secure in-app transactions.

**Integrations: RESTful API, Push notifications, Scheduler**

**Framework : React Native**

# Wapicc

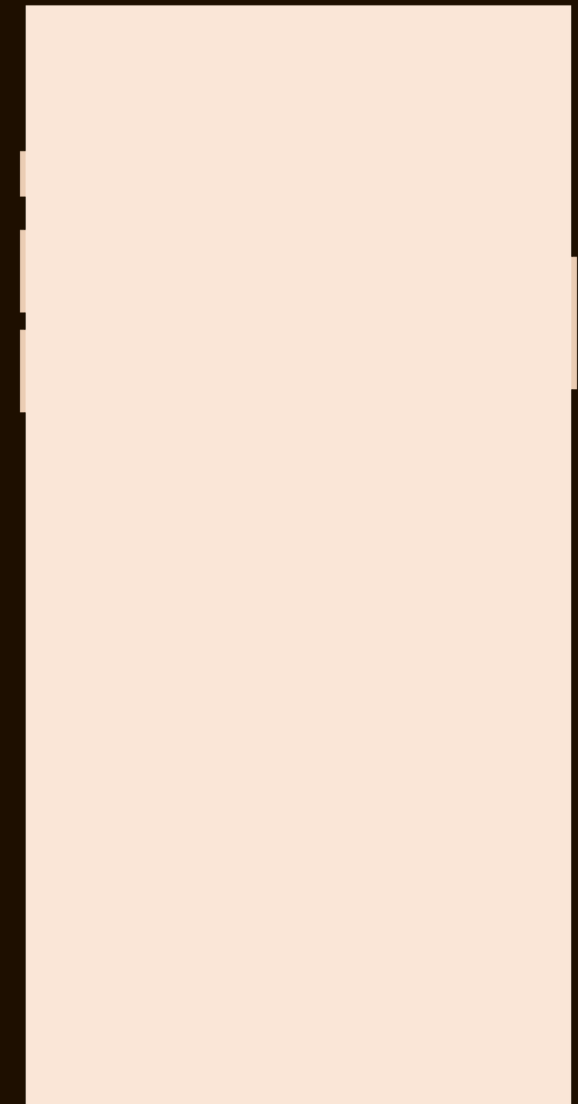

Nov 2019 – Jan 2020

Developed a marketplace mobile app for photographers and videographers, allowing customers across Indonesia to book professional photo and video services seamlessly.

Mobile Development :

- **App Architecture & Features:** Built a cross-platform app for iOS and Android enabling service discovery, booking, and order tracking.
- **API Integration:** Integrated backend APIs for user authentication, service listings, and secure in-app transactions.
- **Real-time Updates:** Implemented real-time notifications for booking confirmations, order status, and messaging between clients and service providers.
- **Performance Optimization:** Enhanced app performance for smooth media browsing and quick search results.

**Integrations:** Secure payment gateway, real-time order tracking, push notifications for booking and messaging

**Framework : React Native**

**<https://play.google.com/store/apps/details?id=com.wapiccapp&hl=in>**

# Jasamart

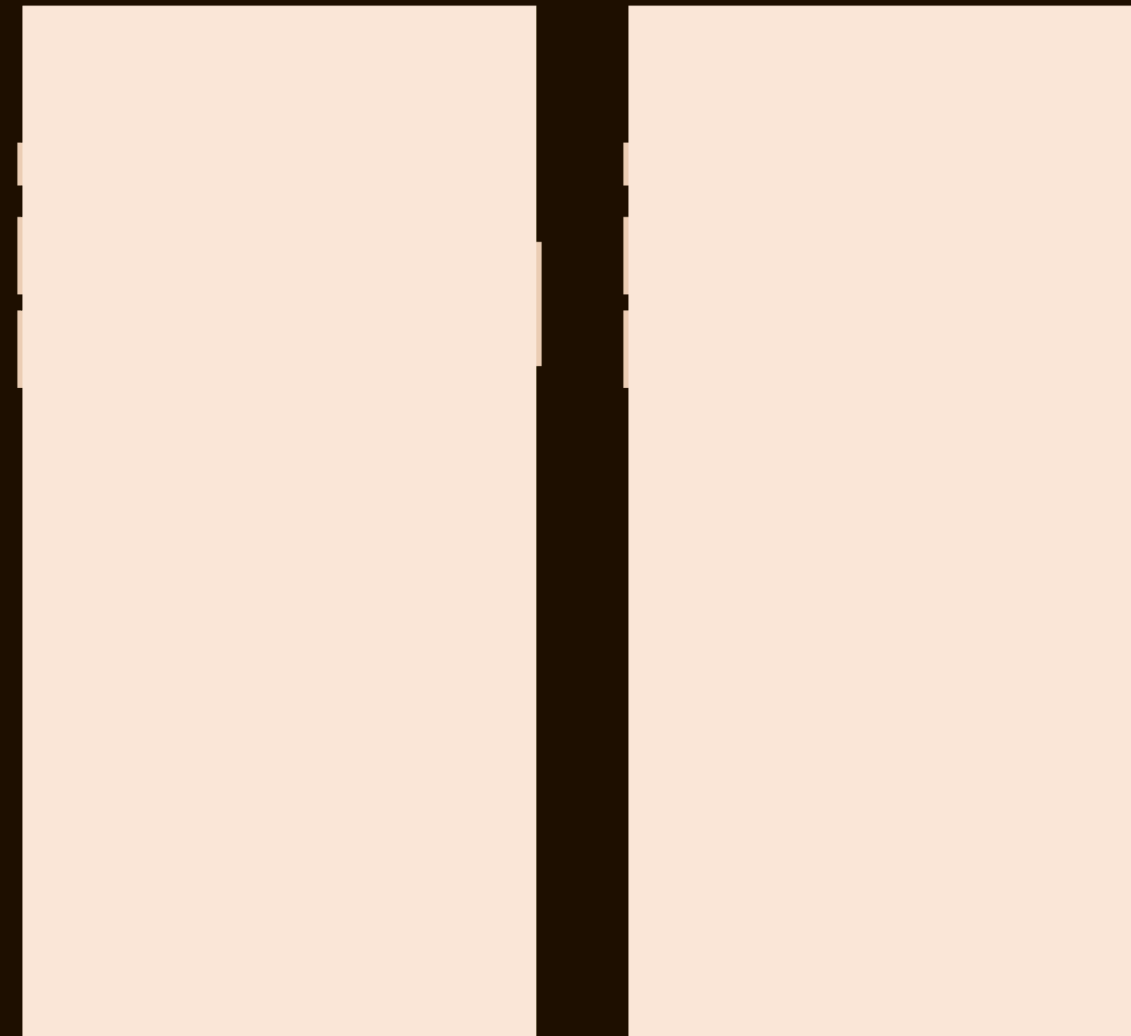

Built a mobile marketplace app offering a wide range of on-demand services, connecting customers with service providers through a simple and efficient booking system.

Mobile Development :

- **App Architecture & Features:** Developed a cross-platform app for iOS and Android enabling service discovery, ordering, and scheduling.
- **API Integration:** Integrated backend APIs for service listings, user registration, and secure in-app transactions.
- **Real-time Notifications:** Implemented push notifications for order confirmations, updates, and service reminders.
- **User Experience Optimization:** Focused on responsive design and smooth navigation to improve service booking flow.

**Integrations: Secure payment gateway, real-time order tracking, push notification system**

**Nov 2018 - Jan 2019 Continues feature updates till 2020**

**Framework : React Native**

**<https://play.google.com/store/apps/details?id=com.jasamart&hl=in>**

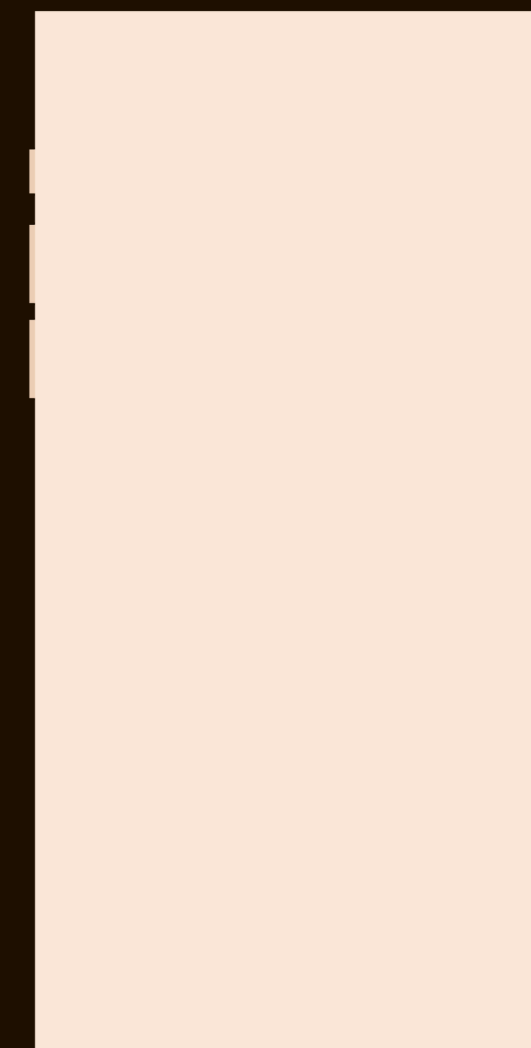

# JDM Cleaning

Jun 2019 - Aug 2019

Developed a mobile booking app for JDM Company, enabling customers to schedule and manage professional cleaning services with ease.

## Mobile Development

- **App Architecture & Features:** Built a cross-platform app for iOS and Android to support service selection, booking, and order tracking.
- **API Integration:** Connected backend APIs for user authentication, service catalog, and secure payment processing.
- **Real-time Notifications:** Implemented push notifications for booking confirmations, service updates, and reminders.
- **Performance Optimization:** Enhanced app responsiveness and reduced load times for a seamless booking experience.

**Integrations:** Secure payment gateway, real-time booking management, push notification system

**Framework :** React Native

<https://play.google.com/store/apps/details?id=com.jdmcleaning&hl=in>

# ADM Online

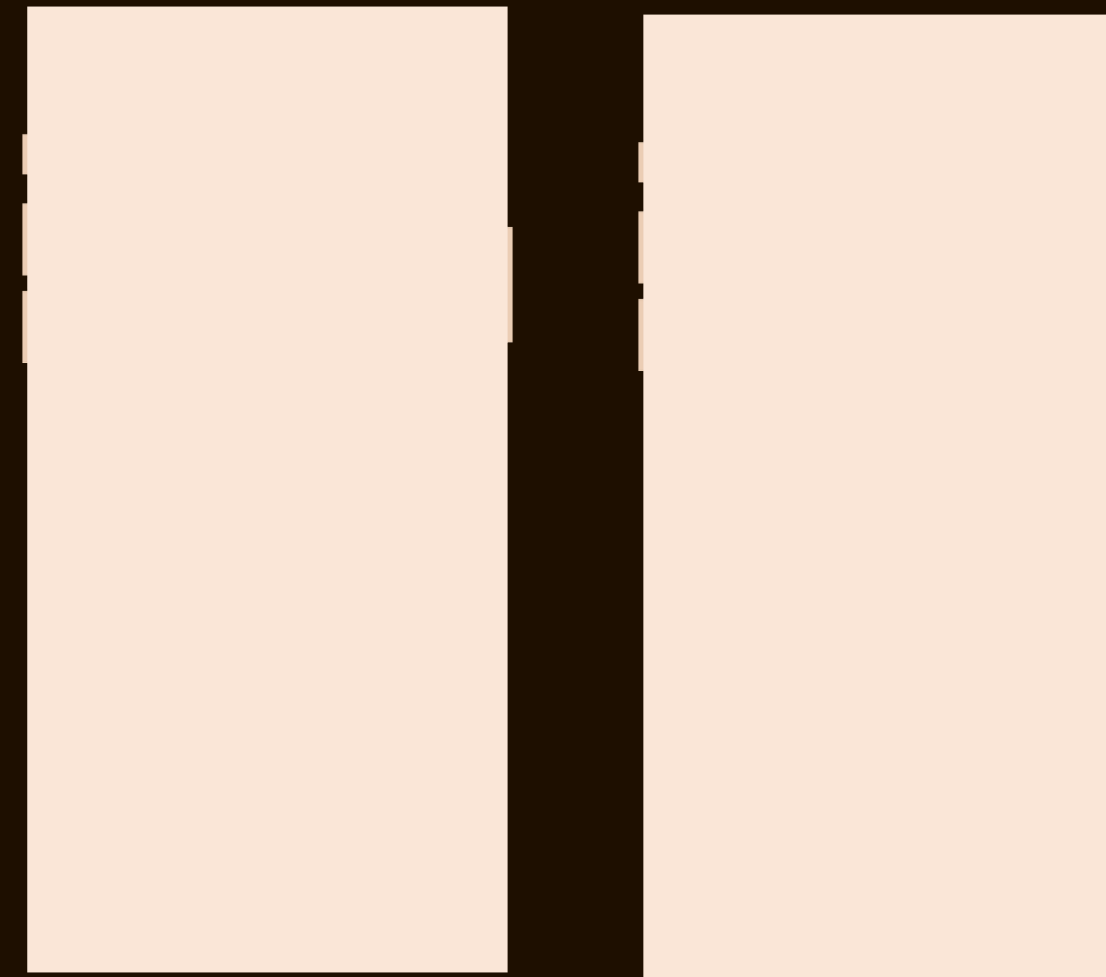

Developed a mobile-commerce app for purchasing automotive spare parts online, providing customers with a convenient way to browse, order, and track products.

## Mobile Development :

- App Architecture & Features: Built a cross-platform app for iOS and Android supporting product catalog browsing, shopping cart, and order management.
- API Integration: Integrated backend APIs for inventory management, secure payments, and real-time order tracking.
- Real-time Notifications: Implemented push notifications for order confirmations, shipment updates, and promotional offers.
- User Experience Optimization: Enhanced search functionality and product filtering for faster and more accurate part discovery.

**Integrations: Secure payment gateway, real-time inventory updates, order tracking system, push notifications**

**Feb 2019 - Jun 2019**

**Framework : React Native**

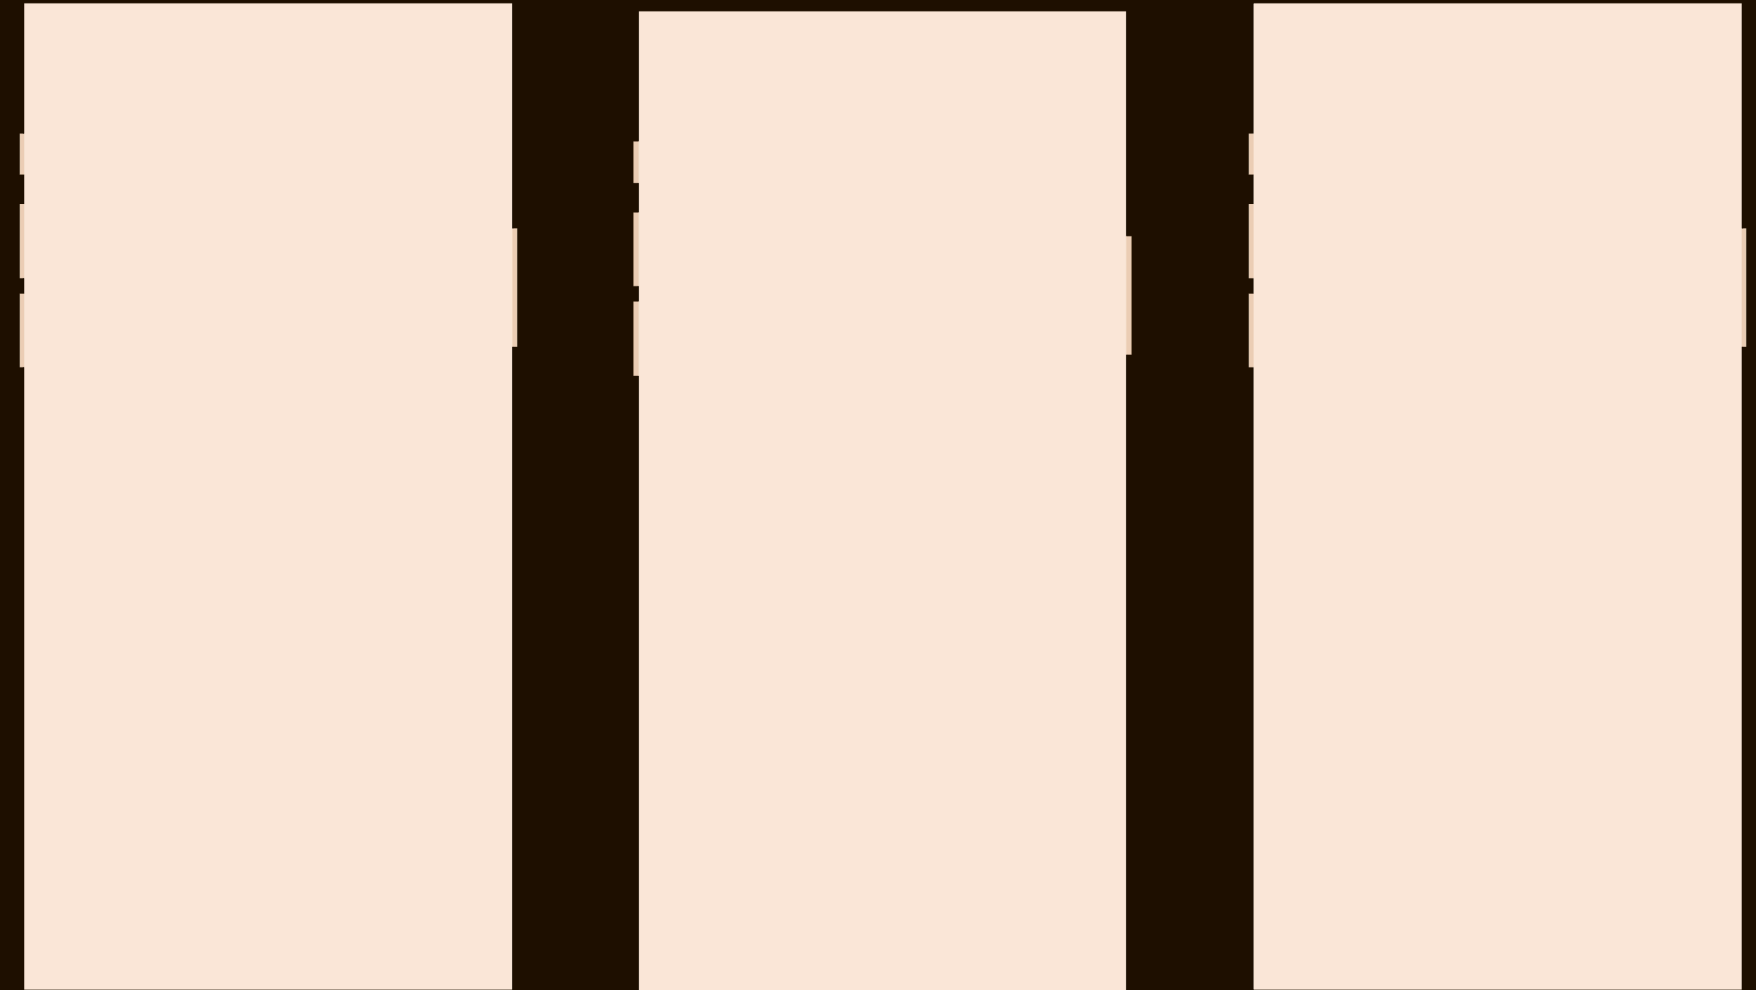

**<https://play.google.com/store/apps/details?id=us.eyesimple.adr&hl=in>**

# Bahana Group HRIS Feb 2020 - Jul 2020

Developed a business operations mobile app for ship and container fuel supply companies to streamline employee management and reporting processes.

## Mobile Development :

- App Architecture & Features: Built a cross-platform app for iOS and Android supporting employee attendance via QR codes, office GPS, and home GPS for WFH scenarios. Task & Reporting System: Implemented task assignment, daily reporting for multiple employees, and job report review/approval workflows for supervisors. API Integration: Integrated backend APIs for real-time location tracking, report submissions, and secure data synchronization. Real-time Notifications: Added push notifications for task updates, attendance confirmations, and report approvals. Performance Optimization: Optimized location services and data handling for accurate GPS tracking and smooth user experience.
- 

**Integrations: QR code attendance system, GPS-based location tracking (office & home), task management and reporting workflow, push notification system**

**Framework : React Native**

# Mercusuar Beton

Sep 2019 - Dec 2019

Framework : React Native

Developed an internal operations mobile app for Mercusuar Beton employees to manage ordering, validation, and delivery processes efficiently.

- App Architecture & Features: Built a cross-platform app for iOS and Android to handle order creation, validation, delivery tracking, and management workflows.
- API Integration: Connected backend APIs for real-time order status updates, inventory management, and delivery scheduling.
- User Management: Enabled role-based access for employees, supervisors, and managers to streamline operations and approvals.
- Real-time Notifications: Implemented push notifications for order confirmations, status changes, and delivery updates.
- Performance Optimization: Enhanced data synchronization and minimized latency for smooth internal communication.

**Integrations: Real-time order tracking, inventory management system, role-based user access, push notification system**

# Packbagus

Jan 2020 - Feb 2020

Framework : React Native

Developed a custom ordering mobile app for product packaging, containers, and boxes, allowing customers to design and order packaging with full customization options.

- App Architecture & Features: Built a cross-platform app for iOS and Android enabling users to customize packaging by shape, material, and color before placing orders.
- API Integration: Integrated backend APIs for product configuration, order management, and secure payment processing.
- Real-time Previews: Implemented dynamic previews to display user-selected design options instantly.
- Order Tracking: Enabled customers to monitor order status from production to delivery.
- Performance Optimization: Improved rendering performance to handle complex customization and large product catalogs.

**Integrations: Secure payment gateway, real-time order tracking, dynamic product customization system, push notifications**

# MPM Motor

Developed a delivery tracking mobile app for monitoring motorcycle and spare parts logistics, enabling real-time tracking and efficient goods management.

- **App Architecture & Features:** Built a cross-platform app for iOS and Android to handle inbound/outbound goods checks, truck entry/exit verification, and GPS-based delivery tracking.
- **Backend Integration:** Integrated backend APIs for delivery scheduling, truck location updates, and goods receipt validation.
- **Offline Capability:** Implemented offline data storage for goods receipt confirmations when network connectivity is unavailable.
- **Real-time Notifications:** Added push notifications for delivery status, truck arrivals, and goods receipt confirmations.
- **Performance Optimization:** Enhanced GPS tracking accuracy and minimized battery consumption during long-haul deliveries.

**Dec 2020 - Mar 2021**

**Integrations: GPS-based truck tracking, offline goods receipt confirmation, secure delivery status updates, push notification system**

**Tech : React Native**
